## The 50<sup>th</sup> Anniversary Commemoration Symposium

### 日本免疫学会 50 周年記念シンポジウム

The 50<sup>th</sup> Anniversary Commemoration Symposium

Room A 15:25~17:25 December 8

### 50S. 日本免疫学会 50 周年記念シンポジウム

Chairpersons: 小安 重夫 (理化学研究所)

渋谷彰(筑波大学)

OD50S-01免疫学の夢

15:25~15:40 笹月 健彦 九州大学高等研究院

OD50S-02繋がり、広がる研究

15:40~15:55 稲葉 カヨ 京都大学

OD 50S-03 種の生存に不可欠な NKT 細胞の不思議

15:55~16:10 谷口 克 理化学研究所 生命医科学研究センター

OD 50S-04 がん免疫治療から見る免疫制御の謎

16:10~16:25 本庶 佑 京都大学大高等研究院

OD 50S-05 Interleukin6 と共に 50 年 一関節炎から CAR-T 細胞そして COVID19 までー

16:25~16:40 岸本 忠三 大阪大学免疫学フロンティア研究センター免疫機能統御学講座

## **Overview Talk**

### **Program for Overview Talks**

8:30 ~ 9:00, Wednesday, December 8

### OD OT01 Overview Talk 01 Room A: Noh Theater

Chairpersons: Sho Kitamoto (University of Michigan Medical School)
Naoko Ohtani (Osaka City University)

### Orchestrating human pathology and physiology via host-microbiota interactions between the gut and distant organs

Sho Kitamoto The University of Michigan Medical School

8:30 ~ 9:00, Wednesday, December 8

### OD OT02 Overview Talk 02 Room B: Conference Room1&2

Chairpersons: Yuki Kagoya (Aichi Cancer Center Research Institute)
Yosuke Togashi (Okayama University)

### Understanding T cell states at molecular levels

Yuki Kagoya Division of Immune Response, Aichi Cancer Center Research Institute, Nagoya, Japan / Division of Cellular Oncology, Department of Cancer Diagnosis and Therapeutics, Nagoya University Graduate School of Medicine, Nagoya, Japan

8:30 ~ 9:00, Wednesday, December 8

### OT03 Overview Talk 03 Room C: Conference Room 3&4

Chairpersons: Michio Miyajima (RIKEN)

Toshihiko Kobayashi (Research Institute National Center for Global Health and Medicine)

### **Immunometabolism**

Michio Miyajima CENTER for Integrative Medical Sciences (IMS), RIKEN, Kanagawa, Japan

8:30 ~ 9:00, Wednesday, December 8

### OT04 Overview Talk 04 Room D: Reception Hall 1

Chairpersons: Yasutaka Motomura (Osaka University) Tetsuro Kobayashi (RIKEN)

### Barrier Immunity in the homeostasis and pathogen defense

Tetsuro Kobayashi Innate Immune Systems, IMS, RIKEN, Yokohama, Japan

8:30 ~ 9:00, Thursday, December 9

### OD OT05 Overview Talk 05 Room A: Noh Theater

Chairpersons: Ken Ishii (The University of Tokyo)

Galit Alter (Harvard Medical School)

### SARS-CoV-2 immunity following natural infection and vaccination

Yoshimasa Takahashi National Institute of Infectious Diseases, Tokyo, Japan

8:30 ~ 9:00, Thursday, December 9

### OD OT06 Overview Talk 06 Room B: Conference Room 1&2

Chairpersons: Akihiko Yoshimura (Keio University School of Medicine)
Takashi Satoh (Tokyo Medical and Dental University)

### Inflammation Cellular Society in lung fibrosis

Kouji Matsushima Tokyo University of Science

8:30 ~ 9:00, Thursday, December 9

### OT07 Overview Talk 07 Room C: Conference Room 3&4

Chairpersons: Keishi Fujio (The University of Tokyo) Yukinori Okada (Osaka University)

### Immune system variation induced by the genetic risk of autoimmunity

Kazuyoshi Ishigaki RIKEN Center for Integrative Medical Sciences, Laboratory for human immunogenetics

8:30 ~ 9:00, Thursday, December 9

### OT08 Overview Talk 08 Room D: Reception Hall 1

Chairpersons: Masato Kubo (Tokyo University of Science • Riken IMS) Saeko Nakajima (Kyoto University)

### Recent advances of IgE, mast cells, and basophile

Masato Kubo Division of Molecular Pathology, Research Institute for Biomedical Science, Tokyo University of Science / Laboratory for Cytokine Regulation, Research Center for Integrative Medical Science (IMS), RIKEN Yokohama Institute

8:30 ~ 9:00, Thursday, December 9

### OT09 Overview Talk 09 Room E: Reception Hall 2

Chairpersons: Kazuko Shibuya (University of Tsukuba)
Taku Okazaki (The University of Tokyo)

### Recent advancements in understanding of regulatory mechanisms for anti-tumor immune responses

**Taku Okazaki** Institute for Quantitative Biosciences, The University of Tokyo, Tokyo, Japan

8:30 ~ 9:00, Friday, December 10

### OD OT10 Overview Talk 10 Room A: Noh Theater

Chairpersons: Akinori Takaoka (Hokkaido University)

Sorimachi Noriko (Research Institute National Center for Global Health and Medicine)

### Innate and adaptive immune responses to SARS-CoV-2 infection

Hiroyuki Oshiumi Department of Immunology, Faculty of Life Sciences, Kumamoto University

8:30 ~ 9:00, Friday, December 10

### OD OT11 Overview Talk 11 Room B: Conference Room 1&2

Chairpersons: Akira Shibuya (University of Tsukuba) Hisashi Arase (Osaka University)

### Recent advances in innate lymphocyte research

Tsukasa Nabekura Life Science Center for Survival Dynamics, Tsukuba Advanced Research Alliance (TARA), University of Tsukuba, Japan

/ Department of Immunology, Faculty of Medicine, University of Tsukuba, Japan / R&D Center for Innovative Drug

Discovery, University of Tsukuba, Japan

8:30 ~ 9:00, Friday, December 10

### OT12 Overview Talk 12 Room C: Conference Room 3&4

Chairpersons: Kenji Kabashima (Kyoto University)
Atsushi Kumanogoh (Osaka University)

### Recent advances in clinical application of cytokine research

**Tsutomu Takeuchi** Division of Rheumatology, Keio University School of Medicine.

8:30 ~ 9:00, Friday, December 10

### OD OT13 Overview Talk 13 Room D: Reception Hall 1

Chairpersons: Isao Matsumoto (University of Tsukuba)

Masaru Ishii (Osaka University)

### **Autoimmunity and human Immunology**

Isao Matsumoto Division of Rheumatology, Department of Internal Medicine, University of Tsukuba

8:30 ~ 9:00, Friday, December 10

### D OT14 Overview Talk 14 Room E: Reception Hall 2

Chairpersons: Toshiaki Ohteki (Tokyo Medical and Dental University) Yumiko Oishi (Nippon Medical School)

### **Overview Talk**

Tomohiko Tamura Yokohama City University Graduate School of Medicine

## **Symposium**

### **Program for Symposia**

Symposium 01

Room A 9:00~11:30 December 8

### S01. Systemic organ interactions in health and disease

Chairpersons: Sho Kitamoto (University of Michigan Medical School)
Naoko Ohtani (Osaka City University)

S01-01

The Role of the Microbiome in Pancreatic Oncogenesis

9:00~9:30

Donnele Daley University of Michigan

**OD** S01-02

Microbiome centered therapies for fatty liver disease

9:30~10:00

Bernd Schnabl UC San Diego School of Medicine

S01-03

The role of gut microbiota in obesity-associated liver cancer development

Naoko Ohtani Graduate School of Medicine, Osaka City University

**OD** S01-04

Autonomic reflex by liver-brain-gut axis maintains the colonic Treg

10:30~11:00

11:00~11:30

**Toshiaki Teratani** Division of Gastroenterology and Hepatology, Department of Internal Medicine, Keio University School of Medicine, Tokyo, Japan

**OD** S01-05

The oral cavity as a reservoir of pathogenic bacteria and immune cells in the gut pathology

Sho Kitamoto Department of Internal Medicine, University of Michigan Medical School

Symposium 02

Room B 9:00~11:30 December 8

# S02. Redefining T cell exhaustion: dissecting heterogeneity and translation into immunotherapy ASI-JSI Joint Session

Chairpersons: Yuki Kagoya (Aichi Cancer Center Research Institute) Yosuke Togashi (Okayama University)

\$02-01 9:00~9:30 Fatty acid metabolism directs cell fate decision during the generation of memory CD4<sup>+</sup> T cells

Yusuke Endo Laboratory of Medical Omics Research, Kazusa DNA Research Institute / Department of Omics Medicine, Graduate School of Medicine, Chiba University

OD S02-02

Role of mTOR in T cell exhaustion

Koichi Araki Cincinnati Children's Hospital Medical Center, University of Cincinnati Department of Pediatrics

OD S02-03

Several "exhausted" T cells in the tumor microenvironment

Yosuke Togashi Department of Tumor Microenvironment, Okayama University, Graduate School of Medicine Dentistry and Pharmaceutical Sciences

**OD** S02-04

Long-term maintenance of T cell resonses in chronic infection and cancer

10:30~11:00 Axel Kallies Department of Microbiology and Immunology, The Peter Doherty Institute for Infection and Immunity, University of Melbourne, Melbourne, Australia

### **CD69** regulates anti-tumor immunity

Motoko Kimura Graduate school of Medicine, Chiba University

Symposium 03

Room C 9:00~11:30 December 8

### S03. A novel immune regulation governed by Immunometabolism

Chairpersons: Michio Miyajima (RIKEN)

Toshihiko Kobayashi (Research Institute National Center for Global Health and Medicine)

OD S03-01 9:00~9:30 Intersection of inflammation and metabolism; roles of endolysosome-resident amino acid transporters in immune responses

Toshihiko Kobayashi Research Institute, National Center for Global Health & Medicine (NCGM)

**OD** S03-02

9:30~10:00

Polyamine metabolism is a central determinant of helper T cell lineage fidelity

Erika Pearce Cancer Immunology Program Bloomberg~Kimmel Institute for Cancer Immunotherapy The Sidney Kimmel Comprehensive Cancer Center at Johns Hopkins

OD S03-03

A novel B cell-derived metabolite elicits anti-inflammatory macrophages and limits antitumor cytotoxic responses

Sidonia Fagarasan Laboratory for Mucosal Immunity, Center for Integrative Medical Sciences, RIKEN / Division of Integrated High-Order Regulatory Systems, Center for Cancer Immunotherapy and Immunobiology, Kyoto University Graduate School of

Medicine, Kyoto University

OD S03-04 How Tfr cells control plasma cell differentiation

Carola Vinuesa The Australian National University Canberra, Australia / The Francis Crick Insitute London, UK

**OD** S03-05

10:30~11:00

11:00~11:30

Visualization of oxygenase producing bioactive molecules by mass spectrometry imaging

Yuki Sugiura Department of Biochemistry, School of Medicine Keio University

Symposium 04

Room D 9:00~11:30 December 8

### S04. Barrier Immunity in the homeostasis and pathogen defense

Chairpersons: Yasutaka Motomura (Osaka University) Tetsuro Kobayashi (RIKEN)

**OD** S04-01

Immune response to SARS-CoV-2

Akiko Iwasaki Yale University School of Medicine / Howard Hughes Medical Institute

OD S04-02 9:30~10:00

Determining the state of type 2 innate immune response in the lung in old age

Aki Minoda Laboratory for Cellular Epigenome, Center for Integrative Medical Sciences, RIKEN

OD S04-03

Skin local activation of TGFb shapes antigen-specific memory CD8<sup>+</sup> T cell pool for optimal skin defense

Toshiro Hirai Departments of Dermatology and Immunology, University of Pittsburgh, Pittsburgh / Vaccine Creation Group, BIKEN Innovative Vaccine Research Alliance Laboratories, Institute for Open and Transdisciplinary Research Initiatives/Research Institute for Microbial Diseases, Osaka University, Osaka, Japan

S04-04

10:30~11:00

11.00~11.30

The role of staphylococcal quorum sensing in the pathogenesis of skin and systemic infections

Yumi Matsuoka-Nakamura Cutaneous Immunology, Immunology Frontier Research Center, Osaka University

**OD** S04-05

Disruption of host-microbial symbiosis results in inflammatory destruction of the hair follicles

Keisuke Nagao National Institute of Arthritis and Musculoskeletal and Skin Diseases. National Institutes of Health

Symposium 05

Room A 9:00~11:30 December 9

## S05. Neo-Immunology by COVID-19 vaccine R&D SFI-JSI, GFI-JSI, and KAI-JSI Joint Session

Chairpersons: Ken Ishii (The University of Tokyo)
Galit Alter (Harvard Medical School)

**OD** S05-01

**Nucleoside-modified mRNA-LNP therapeutics** 

9:00~9:30 **Drew Weissman** University of Pennsylvania

OD S05-02 9:30~10:00 Mycobacterium Tuberculosis-specific Thet<sup>+</sup> CD4<sup>+</sup> memory T cells contribute to trained immunity against again

immunity against cancer and viral infection

Burcu Temizoz Division of Vaccine Science, The Institute of Medical Science, The University of Tokyo, Tokyo, Japan

**OD** S05-03

10:00~10:30

Development of mucosal immunity-inducing prime-boost vaccine

Satoshi Uematsu Department of Immunology and Genomics, Metagenome Analysis Research Center, Osaka City University Graduate School of Medicine / Division of Metagenome Medicine, Human Genome Center, The Institute of Medical Science, The University of Tokyo

**OD** S05-04

Distinct systemic and mucosal immune responses during acute SARS-CoV-2 infection

James P. Di Santo Innate Immunity Unit, Institut Pasteur, Inserm U1223, Paris, France

\$05-05

10:30~11:00

**Defining Correlates of Immunity against SARS-CoV-2** 

11:00~11:30 Galit Alter Harvard Medical School, USA

Symposium 06

Room B 9:00~11:30 December 9

### S06. Inflammation, tissue repair, and fibrosis

Chairpersons: Akihiko Yoshimura (Keio University School of Medicine)
Takashi Satoh (Tokyo Medical and Dental University)

OD S06-01 9:00~9:30 Fibrosis in Nonalcoholic steatohepatitis (NASH)

David Brenner UC San Diego

OD S06-02

Development of robust scRNA-seq method TAS-Seq and investigation of the roles of interstitial macrophages in pulmonary fibrosis

Shigeyuki Shichino Division of Molecular Regulation of Inflammatory and Immune Diseases, Institute of Biomedical Sciences, Tokyo University of Science, Chiba, Japan

S06-03

Multimodal analysis of regeneration process in intestinal tissues

10:00~10:30 Toshiro Sato Keio University School of Medicine

### Macrophage diversity that regulates skeletal muscle regeneration

Yumiko Ojshi Department of Biochemistry and Molecular Biology, Nippon Medical School, Japan

### Decoding macrophage phenotypes in health and disease

11:00~11:30 Christopher Glass University of California San Diego, La Jolla CA, USA

Symposium 07

Room C 9:00~11:30 December 9

### S07. System immunology approach for immune regulation research

Chairpersons: Keishi Fujio (The University of Tokyo) Yukinori Okada (Osaka University)

**OD S07-01** 9:00~9:30

Statistical genetics, disease biology, drug discovery, and personalized medicine

Yukinori Okada Department of Statistical Genetics, Osaka University Graduate School of Medicine, Osaka, Japan.

**OD S07-02** 9:30~10:00

Approach to immune-mediated disease by functional genome analysis

Keishi Fujio Department of Allergy and Rheumatology, The University of Tokyo, Japan

**OD** S07-03

Metagenome analysis leads a paradigm shift in health/medical care

Seiya Imoto Human Genome Center, The Institute of Medical Science, The University of Tokyo

**OD** S07-04

**Neutrophil heterogeneity and autoimmunity** 

10:30~11:00 Mariana Kanlan, National Institute of Arthritis and Museulaskelate

Mariana Kaplan National Institute of Arthritis and Musculoskeletal and Skin Diseases, National Institutes of Health

\$07-05

Massively Multiplexed Analysis of Immunobiology

Sean C. Bendall Department of Pahology. Stanford University School of Medicine

Symposium 08

Room D 9:00~11:30 December 9

## S08. Next advances in Allergic research JSA-JSI Joint Session

Chairpersons: Masato Kubo (Tokyo University of Science • Riken IMS) Saeko Nakajima (Kyoto University)

**OD** S08-01

### **Neuroimmune Regulation of Itch**

Brian Kim Washington University School of Medicine

OD S08-02 9:30~10:00

9:00~9:30

Crosstalk between skin resident commensals and host immune system in the pathogenesis of inflammatory skin diseases

Saeko Nakajima Kyoto University Graduate School of Medicine, Kyoto, Japan

**OD** S08-03

### A pathogenic role of IL-13 in anaphylaxis

10:00~10:30 Takanori Sasak

Takanori Sasaki Research Institute for Biomedical Sciences, Tokyo University of Science, Tokyo, Japan / Harvard Medical School/Brigham and Women's Hospital, Boston, MA, USA / Division of Rheumatology, Department of Internal Medicine, Keio University School of Medicine, Tokyo, Japan

S08-04 10:30~11:00

### Two Sides of the Coin: Mast Cells as a Key Regulator of Allergy and Inflammation

Yosuke Kurashima Department of Innovative Medicine, Graduate School of Medicine, Chiba University, Chiba, Japan / Department of Mucosal Immunology, The University of Tokyo Distinguished Professor Unit, The Institute of Medical Science. The University of Tokyo, Tokyo, Japan / International Research and Development Center for Mucosal Vaccines, The Institute of Medical Science, The University of Tokyo, Tokyo, Japan

S08-05

### Macrophage Biology: From Development to Functions

11.00~11.30

Florent Ginhoux Singapore Immunology Network (SIgN) / Agency for Science, Technology and Research (A\*STAR)

Symposium 09

Room E 9:00~11:30 December 9

### S09. Regulation of anti-tumor immune responses **ASI-JSI Joint Session**

Chairpersons: Kazuko Shibuya (University of Tsukuba) Taku Okazaki (The University of Tokyo)

S09-01

### Tumor-derived soluble CD155 inhibits DNAM-1-mediated tumor immunity

Kazuko Shibuya Department of Immunology, Faculty of Medicine, University of Tsukuba, Tsukuba, Japan

S09-02

### Force-driven tumor immunotherapy

9:30~10:00

Bo Huang Chinese Academy of Medical Sciences & Peking Union Medical College

S09-03 10:00~10:30

9:00~9:30

### Regulatory mechanisms of T cell activation by immuno-inhibitory co-receptors

Taku Okazaki Laboratory of Molecular Immunology, Institute for Quantitative Biosciences, The University of Tokyo, Tokyo, Japan

S09-04

### Immunosuppression by regulatory T cells in the tumor microenvironment

10.30~11.00

Hiroyoshi Nishikawa Department of Immunology, Nagoya University Graduate School of Medicine, Nagoya, Japan / Division of Cancer Immunology, Research Institute/ EPOC, National Cancer Center, Tokyo, Japan

S09-05

### Engineering Chimeric Antigen Receptor T cells to engage host immunity

11:00~11:30 Paul Beavis Peter MacCallum Cancer Centre, Melbourne, Australia

Symposium 10

Room A 9:00~11:30 December 10

### \$10. Innate and adaptive immunities against viral infection including COVID-19 KAI-JSI, and DGFI-JSI Joint Session

Chairpersons: Akinori Takaoka (Hokkaido University)

Noriko Sorimachi (Research Institute National Center for Global Health and Medicine)

S10-00

### Introduction

9:30~9:31

Akinori Takaoka Division of Signaling in Cancer and Immunology, Institute for Genetic Medicine, Hokkaido University, Sapporo, Japan

S10-01 9.31~10.01

### Understanding the pathogenesis of COVID-19 based on pathological perspectives

Tadaki Suzuki Department of Pathology, National Institute of Infectious Diseases

S10-02

### Innate recognition of SARS-CoV-2 in human lung cells

10:01~10:29

Akinori Takaoka Division of Signaling in Cancer and Immunology, Institute for Genetic Medicine, Hokkaido University, Sapporo, Japan

**OD** S10-03

Phenotypes and functions of SARS-CoV-2-specific T cells

10:29~10:59

Eui-Cheol Shin Graduate School of Medical Science and Engineering, Korea Advanced Institute of Science and Technology (KAIST), Daejeon,

**OD** S10-04

T cell immunity and development of a peptide-based vaccine to combat COVID-19

10:59~11:29

Juliane Walz

Clinical Collaboration Unit Translational Immunology, German Cancer Consortium (DKTK), Department of Internal Medicine,
University Hospital Tübingen, Tübingen, Germany / Institute for Cell Biology, Department of Immunology, University of Tübingen,
Tübingen, Germany / Cluster of Excellence iFIT (EXC218) "Image-Guided and Functionally Instructed Tumor Therapies",
University of Tübingen, Tübingen, Germany / Dr. Margarete Fischer-Bosch Institute of Clinical Pharmacology and Robert Bosch

Center for Tumor Diseases (RBCT), Stuttgart, Germany

OD S10-05 Surprises in science – lessons from COVID-19

11:29~11:59 Ivan Dikic Goethe University Frankfurt

S10-99 Closing Remarks

11:59~12:00 Noriko Sorimatchi Research Institute National Center for Global Health and Medicine

Symposium 11

Room B 9:00~11:30 December 10

## S11. Recent advances in innate lymphocyte research US-Japan Immunology Program Co-organized Session

Chairpersons: Akira Shibuya (University of Tsukuba) Hisashi Arase (Osaka University)

OD S11-1 Epigenet

Epigenetic control of NK cells in host immunity

9:00~9:30 Joseph Sun Memorial Sloan Kettering Cancer Center

OD S11-2

Dynamics of Natural Killer Cell Responses and Generation of Memory during Cytomegalovirus Infection

Lewis Lanier University of California San Francisco

**OD** \$11-3

Protective role of type 1 innate lymphoid cells in acute liver injury

10:00~10:30 Tsu

Tsukasa Nabekura Life Science Center for Survival Dynamics, Tsukuba Advanced Research Alliance (TARA), University of Tsukuba, Japan / Department of Immunology, Faculty of Medicine, University of Tsukuba, Japan / R&D Center for Innovative Drug Discovery, University of Tsukuba, Japan

S11-4

Fibroblast-derived IL-33 causes pulmonary fibrosis via activation of ILC2

Kazuyo Moro Laboratory for Innate Immune Systems, Department of Microbiology and Immunology, Graduate School of Medicine, Osaka University / Laboratory for Innate Immune Systems, RIKEN-IMS

OD S11-5 11:00~11:30 Interaction of innate lymphoid cells and bacteria - important mediator for the host defense -

Naoko Satoh-Takayama Laboratory for Intestinal Ecosystem, RIKEN Center for Integrative Medical Sciences (IMS)

### S12. Recent advances in clinical application of cytokine research

Chairpersons: Kenji Kabashima (Kyoto University) Atsushi Kumanogoh (Osaka University)

S12-1

IL-17 family cytokines in health and diseases

9:00~9:30

Chen Dong Institute for Immunology, Tsinghua University, Beijing, China.

OD \$12-2 9:30~10:00 Caspase-1-mediated secretion of mitochondrial DNA-rich exosomes causes pathological inflammation in a human chronic inflammatory disorder

**Hyota Takamatsu** Department of Respiratory Medicine and Clinical Immunology, Graduate School of Medicine, Osaka University / Department of Immunopathology, WPI, Immunology Frontier Research Center (iFReC), Osaka University

OD S12-3 10:00~10:30 Further application of IL-6-targeting therapy for cytokine storms by COVID-19, CAR-T cell therapy and other diseases

Sujin Kang Laboratory of Immune Regulation, iFReC, Osaka University

\$12-4 10:30~11:00 Complex immune dysregulation in patients with autoinflammatory disease and IFN signatures

Raphaela Goldbach-Mansky MHS, Translational Autoinflammatory Diseases Section (TADS), LCIM, NIAID, NIH, Bethesda, MD, USA

**OD** S12-5

**Neuroimmune Regulation of Itch** 

11:00~11:30 Brian Kim Washington University School of Medicine, USA

Symposium 13

Room D 9:00~11:30 December 10

## S13. Autoimmunity and Human Immunology JCR-JSI Joint Session

Chairpersons: Isao Matsumoto (University of Tsukuba) Masaru Ishii (Osaka University)

**OD** S13-01 9:00~9:30

T cell functions in spontaneous and iatrogenic autoimmune arthritis

Deepak A. Rao Division of Rheumatology, Inflammation, Immunity, Brigham and Women's Hospital and Harvard Medical School

OD S13-02 9:30~10:00

Identification of an arthritis-associated osteoclast precursor macrophage: pathogenesis and treatment

Masaru Ishii Department of Immunology and Cell Biology, Osaka University Graduate School of Medicine

**S13-03** 10:00~10:30

Balancing tolerance and immunity in response to B cell receptor stimulation

Julie Zikherman University of California, San Francisco (UCSF) Medical Center, USA

\$13-04 10:30~11:00 Mechanistic insight of impaired function of PD-1+ follicular regulatory T cells in systemic lupus erythematosus

Isao Matsumoto Division of Rheumatology, Department of Internal Medicine, University of Tsukuba

**OD** \$13-05

IFN $\alpha$  producing cells in patients with systemic lupus erythematosus patients

11:00~11:30 Sachiko Mivake Department of Immunology, Juntendo University Graduate School of Medicine

### S14. Myeloid cells: new developmental mechanism and function

Chairpersons: Toshiaki Ohteki (Tokyo Medical and Dental University) Yumiko Oishi (Nippon Medical School)

**OD** S14-01

Diversity and plasticity of microglia in mice and human

9:00~9:30

Takahiro Masuda Department of Molecular and System Pharmacology, Graduate School of Pharmaceutical Sciences, Kyushu University

\$14-02 9:30~10:00 Macrophage diversity in cardiovascular homeostasis and multimorbidity

Ichiro Manabe Chiba University Graduate School of Medicine

\$14-03 10:00~10:30

10:30~11:00

11:00~11:30

Monocytes in the Prediction of Response to Immunotherapy

Catherine Hedrick La Jolla Institute for Immunology

**OD** S14-04

The transcription factor IRF8 and chromatin in the regulation of myeloid cell development

Tomohiko Tamura Department of Immunology, Yokohama City University Graduate School of Medicine, Yokohama, Japan

**OD** S14-05

Selective ablation of cDC2 specification by -165 Zeb2 enhancer mutations

Ken Murphy Department of Pathology and Immunology, Washington University School of Medicine

## Workshop

○ : Presenter

### Oral

### **December 8**

### WS1 Tolerance and Immune Suppression

12:55~14:10 Room A

Chairpersons: Shunsuke Chikuma, Miyuki Azuma

Immune tolerance is crucial mechanisms for maintaining homeostasis and preventing excess immune responses against self-and nonself-antigens. Tolerance is coordinately regulated by cell-intrinsic and -extrinsic mechanisms, such as co-inhibitory receptor signals, transcription factors, and regulatory T and myeloid cells. In this session, we will first focus on co-signal receptors (CTLA-4, LAG-3, CD86) in T- and B-cell tolerance, and then move to topics of multifaceted regulatory mechanisms by Foxp3+ regulatory T cells at the various organs and tissues. Finally, we will discuss recent concepts of immune suppression mediated by metabolites and nutritional signaling in physiological and/or pathological conditions of tissue-specific microenvironments. We appreciate active participations and discussions for facilitating our comprehensive understanding on tolerance and immune suppression.

### 1-A-WS1-01-O/P Aire suppresses CTLA-4 expression from medullary thymic epithelial cells to avoid autoimmunity Junko Morimoto<sup>1)</sup>, Minoru Matsumoto<sup>1)</sup>, Rvuichiro Miyazawa<sup>1)</sup>, Hidevuki Yoshida<sup>2)</sup>, Mitsuru Matsumoto<sup>1)</sup> Division of Molecular Immunology, Institute for Enzyme Research, Tokushima University, Tokushima, Japan<sup>1)</sup>, YCI Laboratory for Immunological Transcriptomics, RIKEN Center for Integrative Medical Science, Yokohama, Japan<sup>2)</sup> 1-A-WS1-02-O/P LAG-3 engagement with stable pMHCII is essential for the exertion of its inhibitory function ○ Takumi Maruhashi, Daisuke Sugiura, II-mi Okazaki, Kenji Shimizu, Taku Okazaki Laboratory of Molecular Immunology, Institute for Quantitative Biosciences, The University of Tokyo 1-A-WS1-10-O/P Role of Ten-eleven translocation (Tet) in B cell self-tolerance O Shinya Tanaka<sup>1)</sup>, Wataru Ise<sup>2)</sup>, Tomohiro Kurosaki<sup>2,3)</sup>, Yoshihiro Baba<sup>1)</sup> Division of Immunology and Genome Biology, Department of Moleuclar Genetics, Medical Institute of Bioregulation, Kyushu University<sup>1)</sup>, Laboratory of Lymphocyte Differentiation, WPI Immunology Frontier Research Center, Osaka University<sup>2)</sup>, Laboratory of Lymphocyte Differentiation, RIKEN Center for Integrative Medical Sciences<sup>3)</sup> 1-A-WS1-11-O/P Foxp3 changes its genomic binding sites following BATF-dependent effector differentiation of Treg cells Rvuichi Murakami, Shohei Hori Laboratory of Immunology and Microbiology, Graduate School of Pharmaceutical Sciences, The University of Tokyo

### WS2 Innate immunity

12:55~14:10 Room B

Chairpersons: Sho Yamasaki, Miwa Sasai

The study of innate immunity has made considerable progress in the past two decades. It has become clear that an infection by microbes, viruses, and other organisms induces a prompt immune response that leads to inflammation as a host defense response. Innate immunity has also been shown to induce sterile inflammation in response to tissue damage, ischemia, and stress. However, its precise regulatory mechanisms are not fully understood. In this session, we will discuss recent discoveries that revealed novel aspects of the regulation of innate immunity in physiological/pathological settings.

### WS3 Hematopoiesis and Immune Environment

12:55~14:10 Room C

Chairpersons: Takako Hirata, Tomoya Katakai

Hematopoiesis in the bone marrow is the primary source of immune cells and is regulated by a diverse cellular microenvironment that supports hematopoietic stem cell maintenance and immune cell development. Whereas most lineages mature in the bone marrow, T cell development occurs in the thymus. The secondary lymphoid organs, such as the lymph nodes and spleen, are prominent sites where immune responses are initiated. Recent advances in lineage tracing models and single-cell transcriptional analyses revealed a "layered" organization of hematopoiesis, with fetal immune cells contributing to some populations that persist throughout adulthood. In this session, we will discuss the cellular and molecular mechanisms involved in hematopoiesis and immune response in each lymphoid organ and their regulation by the stromal-cell microenvironment, as well as their alterations during infection, aging, and malignancy.

### WS4 T cell antigen-recognition, activation, and effector differentiation 12:55~14:10 Room D Chairpersons: Sayama Ishihara, Tadashi Yokosuka

T cells, including innate ones, play as a leader in the variety of immune responses by regulating more kinds of other immune cells. Therefore, the research unveiling unexplored nature of T cells, particularly its mutual relationship with other physiological systems, such as metabolism and endocrine, has been more and more focused on. Initiation of T cell activation is first introduced by the efficient recognition of antigen peptides bearing on MHCs through TCRs, possessing the diversified repertoires, then the TCR signaling succeeds into various branches in its downstream. In the recent concepts, TCR signaling includes not only its direct downstream but also the other signaling via costimulatory, innate and cytokine receptors and adhesion molecules. We have 9 talks (6 minute-talk and 2 minute-discussion) and 24 posters and hope active participation and discussions.

### WS5 T cell immunity in cancer

12:55~14:10 Room E

Chairpersons: Keiko Udaka, Koji Tamada

This WS focuses mainly on anti-tumor responses mediated by endogenous tumor-specific T cells and exogenously transferred gene-modified T cells in the tumor microenvironment. In addition, novel mechanisms for antigen presentation via exosome or mRNA vaccine to tumor-specific T cells are also presented in the scope of potentiating future immunotherapies. Within this field, one of the major topics is metabolic and mitochondrial regulation of tumor-specific T cells, especially in the mechanisms for the efficacy of immune-checkpoint inhibitors. Recent technical developments including single-cell NGS analysis are also presented, as they are obvious driving forces to facilitate investigations in this field. Finally, novel CAR-T cell technologies and their signaling mechanisms will be introduced. We anticipate an active discussion and a delivery of take-home messages in this WS.

### WS6 Immunity against SARS-CoV-2 and influenza virus

12:55~14:10 Room A

Chairpersons: Sujin Kang, Hisashi Arase

With the global coronavirus pandemic in its second year, we are still struggling against SARS-CoV-2 virus by developing effective vaccines and establishing appropriate therapeutic interventions. Therefore, it is quite important to understand the immunity against viruses. This session is intended to enhance understanding of immune response against viruses including SARS-CoV-2 and influenza viruses. We hope that this session will be a chance to share knowledge, perspectives and discuss solutions to the complex challenges of anti-viral immunity.

#### WS8 B cell-Regulation of B cell immune response

12:55~14:10 Room C

Chairpersons: Reiko Shinkura, Ryo Shinnakasu

B cell antigens (Ags) are divided into two types. T cell-dependent (TD) and -independent (TI). In the TD response, through the interaction between Ag activated helper T cells and B cells, class switch recombination (CSR) and germinal center (GC) formation occur to induce the different class of antibodies and somatic hypermutation (SHM) respectively. In the TI response, instead of T cell help, B cell activation is induced by non-protein Ags, i.g. CpG or polysaccharides, which elicit strong BCR signaling combination with Toll-like receptor (TLR) for antibody secretion. In addition, regulation mechanism of B cell immune response by innate lymphoid cell (ILC) is an area of active research. In this workshop, we would like to focus on the novel findings of 1) class switching mechanism and immune regulation, 2) pre-GC B cell marker, 3) TI immune response, 4) ILC2 function for B cell immunity.

### WS9 Allergy

12:55~14:10 Room D

### Chairpersons: Atsuhito Nakao, Satoko Tahara

Allergic diseases such as asthma, allergic rhinitis, atopic dermatitis, and food allergy are a growing public health, medical, and economic problem worldwide. Although we come to understand several major aspects of allergic diseases though extensive scientific efforts during the past ~50 years, there are still significant puzzles in allergic diseases and the development of effective cure for the diseases has been hindered. In this "Allergy" session, we have selected the research topics that provide a new insight into current allergology and would like to discuss the topics extensively with audience, e.g. what is new, how it advance our understanding of allergy, and how it can translate into the prevention and treatment of allergic diseases.

### WS10 Tumor microenvironment, Effector cells

12:55~14:10 Room E

Chairpersons: Hiroaki Ikeda, Naoko Ohtani

Regardless of the recent progress in immunotherapy of cancer, only limited cancer patients are benefitted from the therapy. To expand the application of cancer immunotherapy, it is important to understand the tumor microenvironment and various immune effector cells that regulate immunological control of tumor in both positive and negative ways. In this session, we will discuss the topic on the tumor microenvironment and immune cells that infiltrate into tumor such as NK cells, NKT cells, macrophages, myeloid-derived suppressor cells, tumor infiltrating B cells and cytotoxic T cells, suggesting their regulation by co-stimulatory/inhibitory signals, agonistic ligands and bispecific antibodies, along with the illustration of their behaviors by new technologies. We envisage many audiences will contribute to this session by active interaction with the presenters.

### WS13 Autoimmune disease-2

14:20~15:35 Room B

Chairpersons: Sayuri Yamazaki, Atsushi Tanaka

Autoimmune diseases affect nearly 5% of the population. How self-tolerance fails and how self-reactive lymphocytes become activated are fundamental questions to understand the etiology and pathogenesis of autoimmune diseases. Following the WS7 Autoimmune disease-1, this workshop will continue to discuss the diverse mechanisms of various autoimmune diseases such as multiple sclerosis, myasthenia gravis, Sjogren's syndrome, IgG4-related diseases, systemic lupus erythematosus (SLE), experimental inflammatory myopathies, and interstitial pneumonia. We would like to ask all attendees to participate in active discussions. (Each presentation will have 7 min talk + 2 min discussion.)

## WS14 B cell- B cell differentiation and anti-SARS-CoV-2 antibody responses

14:20~15:35 Room C

Chairpersons: Masaki Hikida, Kyoko Ochiai

B cell differentiation is well organized by the gene regulatory network, consisted with cytokine signaling and downstream factors such as transcription factors. In addition to the universal gene regulation, recent studies have also revealed the importance of multiple components related to cellular physiological function in regulating B cell differentiation and its function. This session will highlight each factor, which expands and/or give new insight into this field. Furthermore, in the face of novel threaten virus, we also discuss about the significance of neutralizing antibodies against SARS-CoV-2 produced by plasma cells or memory B cells.

#### WS15 T cell differentiation

14:20~15:35 Room D

Chairpersons: Koji Yasutomo, Minako Ito

T cells are central to the maintenance of immune homeostasis and in turn dysregulation of T cell responses causes a variety of diseases resulting in irreversible tissue damages. The functional T cells are defined by distinct expression patterns of transcriptional factors and / or cytokine productions, and the differentiation is regulated by the interplay between intrinsic and extrinsic signals. Although recent technical advance of transcriptome features at the single cell level has promoted to demonstrate functional characteristics of each T cell type, we still do not fully understand the genetic programming and regulatory mechanisms of mature T cells. This workshop aims to facilitate exchange of the latest basic findings of mature T cells as well as discuss the roles of functional T cells in a wide range of disease models. We welcome any questions and comments through oral presentations and posters.

WS1	6 Advan	ces in Immunological Signaling in Tumor Microenvironment 14:20~15:35 Room E Chairpersons: Heiiichiro Udono, Hozumi Motohashi
	been paid to anticancer th their microer progression cells at mole	scovery of impacts of immune checkpoint inhibitors on survival of cancer patients, a great deal of attention has tumor microenvironment and interactions between cancer and immune cells in rigorous efforts to develop effective erapies. From a biological point of view, tumor behaviors are heavily dependent on not only cancer cells but also extraorder. Recent advances in analytical technologies, such as single cell-analyses, have been accelerating the of cancer research by enabling us to capture a whole image of tumors including cancer cells and their surrounding cular levels. In this session, various cellular interactions and communications occurring in tumor tissues, including a cytokine and lipid mediator signaling, and angiogenesis, will be presented and discussed.

### December 10

### WS17 Immune responses to pathogen infection

14:05~15:20 Room A

Chairpersons: Manabu Ato, Miwa Sasai

COVID-19 arises critical but unanswered questions in the point of immunological view: e.g. mechanisms by which some patients undergo severe illness with massive inflammation in the lung, 'stealth' ability of the virus in asymptomatic patients, and quick disappearance of neutralizing antibodies. Indeed, immunology has been originally developed as a scientific approach to visualize prevention and healing process of infectious diseases. However, complexity of immune responses containing plural variables (host and pathogens) left this research field behind others. Now that progress of data technology and huge attention among public enable to leap over the hurdle. This workshop aims for participants to share ideas and findings regarding immune responses against pathogens including virus, bacteria, parasites, and fungi, which will transform researches in infection and immunity in the future.

#### WS18 Innate lymphocytes

14:05~15:20 Room B

Chairpersons: Yuki Kinjo, Kazuyo Moro

In this workshop, we will discuss the studies on  $\gamma\delta$  T cells, NKT cells, NK cells and ILCs which do not have strict antigen specificity like T cells. This workshop will not only focus on new effector and regulatory mechanisms of the innate lymphocytes but also offer a number of talks on development, homeostasis and pathogenesis.  $\gamma\delta$  T cells, NKT cells and NK cells participate in antimicrobial and antitumor responses, and other functions such as regulation of inflammation and augmentation of antibody production are also gathering attention. When the field of ILC research was first established, much of the discussion was about the classification and phenotype of ILCs, but more recently, attention has begun to focus on the interaction of ILCs with other cells and the mechanisms of ILC-induced diseases. Let's have a lively discussion to make up for last year's JSI meeting which was focused on COVID-19.

### WS19 Cytokines and Chemokines

14:05~15:20 Room C

Chairpersons: Shinobu Saijo, Takumi Maruhashi

These molecules play essential roles in many aspects of immune regulation, including cell trafficking, anti-microbial immunity, adaptive immune responses, maintain homeostasis, and promote inflammation. Manipulating their expression or signal transduction via receptors could lead to therapies for various diseases, not only for inflammatory diseases but also for infectious diseases. Therefore, a comprehensive understanding of the cytokine/chemokine network is crucial. In this workshop, we will mainly focus on how cytokines and chemokines and their signaling pathways control the immune functions, the new roles of the molecules, and the therapeutic strategies that target the molecules. We hope this session will help in extending our knowledge of how cytokines/chemokines communicate to maintain homeostasis.

### WS20 T cell development and function

14:05~15:20 Room D

of

Chairpersons: Motoko Kimura, Takeshi Nitta

T cells undergo differentiation and selection in the thymus to shape diverse TCR repertoire, and acquire effector and memory functions upon encountering with various pathogens in the periphery. Multiple mechanisms, including TCR signaling, cytokine signaling, transcription factors, and cellular metabolism, exert key controls on the development and function of T cells. In this session, we would like to discuss several topics on early T cell development, repertoire selection in the thymus, and memory T cell differentiation and function in the periphery. We hope that the discussion in this workshop will advance our understanding of the molecular basis of T cell development and function, for controlling immune responses against infections as well as tumors.

### WS22 Human Immunology

14:05~15:20 Room F

Chairpersons: Ryuta Nishikomori, Satoshi Yamasaki

On human immunology session, we have abstracts on a variety of topics such as autoimmune diseases, autoinflammatory diseases, human immunity, vaccine-related studies, SARS-CoV-2, infection, primary immunodeficiency, and therapy development. To tackle the limitations of the study on the human being, the authors have managed to adopt various techniques, like multi-omics study, disease-mouse models including humanized mice, and iPS cell technology in addition to investigating on human-derived samples. We chose 8 superb abstracts for the oral session based upon the novelty and the impact on the understanding of human immunology as well as application to the therapy. I hope that each participant contributes to the discussions to deepen the understanding of the human immune system.

## Distinct subpopulations of the murine 4T1 breast cancer cells cooperate with cancer metastasis through Wnt/β-catenin signaling pathway by exosomal Wnt7a

Chunning Li. Teizo Yoshimura. Akihiro Matsukawa

Department of Pathology and Experimental Medicine, Dentistry and Pharmaceutical Sciences, Okayama University, Okayama, Japan

### **December 9**

### WS6 Immunity against SARS-CoV-2 and influenza virus

Discussers: Hisashi Arase, Shintaro Hojyo, Satoshi Ishido, Yasushi Itoh, Sujin Kang, Eriko Kudo, Kosuke Miyauchi, Masaaki Murakami, Thanh Cong Nguyen

#### 2-A-WS6-01-O/P

#### Influenza virus infection induces memory phenotype in group 2 innate lymphoid cell

○ Eriko Kudo<sup>1)</sup>, Akihiro Tokuda<sup>1)</sup>, Tsuyoshi Kiniwa<sup>2)</sup>, Kazuyo Moro<sup>1, 2)</sup>

Laboratory for Innate Immune Systems, Department of Microbiology and Immunology, Graduate School of Medicine, Osaka University, Suita, Japan<sup>1)</sup>, Laboratory for Innate Immune Systems, IMS, RIKEN, Yokohama, Japan<sup>2)</sup>

#### 2-A-WS6-02-O/P

### SARS-CoV-2 S1 protein binds to b1 integrins to trigger integrin-mediated activation pathway

○ Eun Jeong Park<sup>1)</sup>, Khwanchanok Mokmued<sup>1)</sup>, Eri Matsuo<sup>1)</sup>, Siqingaowa Caidengbate<sup>1)</sup>, Atsushi Ito<sup>1,2)</sup>, Eiji Kawamoto<sup>1,3)</sup>, Arong Gaowa<sup>1)</sup>, Motomu Shimaoka<sup>1)</sup>

Department of Molecular Pathobiology and Cell Adhesion Biology, Mie University Graduate School of Medicine, Tsu, Japan<sup>1)</sup>, Department of Cardiothoracic Surgery, Mie University Graduate School of Medicine, Tsu, Japan<sup>2)</sup>, Department of Emergency and Disaster Medicine, Mie University Graduate School of Medicine, Tsu, Japan<sup>3)</sup>

#### 2-A-WS6-03-O/P

#### An infectivity-enhancing site on the SARS-CoV-2 spike protein targeted by antibodies

○ Yafei Liu<sup>1,2)</sup>, Wataru Nakai<sup>1,2)</sup>, Noriko Arase<sup>3)</sup>, Masako Kohyama<sup>1,2)</sup>, Hisashi Arase<sup>1,2)</sup>

Department of Immunochemistry, Research Institute for Microbial Diseases, Osaka University, Osaka, Japan<sup>1)</sup>, Laboratory of Immunochemistry, World Premier International Immunology Frontier Research Centre, Osaka University, Osaka, Japan<sup>2)</sup>, Department of Dermatology, Graduate school of Medicine, Osaka University, Osaka, Japan<sup>3)</sup>

### 2-A-WS6-04-O/P

#### Role of germinal center response in the antibody responses against SARS-CoV-2 spike protein

○ Kosuke Miyauchi<sup>1)</sup>, Rina Hashimoto<sup>2)</sup>, Kazuo Takayama<sup>2)</sup>, Masato Kubo<sup>1,3)</sup>

Laboratory for Cytokine Regulation, Center for Integrative Medical Sciences, RIKEN, Japan<sup>1)</sup>, Center for iPS Cell Research and Application, Kyoto University, Japan<sup>2)</sup>, Division of Molecular Pathology, Research Institute for Biomedical Science, Tokyo University of Science, Japan<sup>3)</sup>

#### 2-A-WS6-05-O/P

#### Transient depletion of Treg cells induces adaptive immunity to SARS-CoV-2 antigens

○ Ryuta Uraki<sup>1, 2, 3)</sup>, Masaki Imai<sup>1)</sup>, Hiroaki Shime<sup>1)</sup>, Yoshihiro Kawaoka<sup>2, 3, 4)</sup>, Sayuri Yamazaki<sup>1)</sup>

Nagoya City University Graduate School of Medical Sciences<sup>1)</sup>, Institute of Medical Science, University of Tokyo<sup>2)</sup>, National Center for Global Health and Medicine<sup>3)</sup>, School of Veterinary Medicine, University of Wisconsin-Madison, Madison<sup>4)</sup>

#### 2-A-WS6-06-O/P

#### Cross-reactivity of pre-existing CD8+ T cells against SARS-CoV-2

○ Kanako Shimizu<sup>1)</sup>, Tomonori Iyoda<sup>1)</sup>, Shin-ichiro Fujii<sup>2)</sup>

Laboratory for Immunotherapy, RIKEN Center for Integrative Medical Sciences (IMS)<sup>1)</sup>, RIKEN Program for Drug Discovery and Medical Technology Platforms (DMP)<sup>2)</sup>

#### 2-A-WS6-07-O/P

## In-depth analysis of SARS-CoV-2-specific CD8<sup>+</sup> T cells using T cell library assay on COVID-19 convalescents

○ Hideki Ogura<sup>1)</sup>, Jin Gohda<sup>2)</sup>, Mizuki Yamamoto<sup>2)</sup>, Aoi Son<sup>1)</sup>, Motohiro Murakami<sup>3)</sup>, Jun-ichiro Inoue<sup>4)</sup>, Kunihiro Shirai<sup>3)</sup>. Jun-ichi Hirata<sup>3)</sup>. Satoshi Ishido<sup>1)</sup>

Department of Microbiology, Hyogo College of Medicine, Hyogo, Japan<sup>1)</sup>, Research Center for Asian Infectious Diseases, The Institute of Medical Science, The University of Tokyo, Tokyo, Japan<sup>2)</sup>, Department of Emergency and Critical Care Medicine, Hyogo College of Medicine, Hyogo, Japan<sup>3)</sup>, Research Platform Office, The Institute of Medical Science, The University of Tokyo, Tokyo, Japan<sup>4)</sup>

#### 2-A-WS6-08-O/P

#### SARS-CoV-2 ORF8 is a viral cytokine involved in lung inflammation

○ Masako Kohyama<sup>1, 2)</sup>, Toru Okamoto<sup>3)</sup>, Tatsuya Suzuki<sup>3)</sup>, Hisashi Arase<sup>1, 2)</sup>

Department of Immunochemistry, Research Institute for Microbial Diseases, Osaka University<sup>1)</sup>, Laboratory of Immunochemistry, Immunology Frontier Research center, Osaka University<sup>2)</sup>, Institute for Advanced Co-Creation Studies, Research Institute for Microbial Diseases, Osaka University<sup>3)</sup>

## WS11 Macrophages/Dendritic cells in inflammation and diseases

Discussers: Tsuneyasu Kaisho, Taro Kawai, Noriko Kubota, Kensuke Miyake, Daisuke Ori, Hideaki Takagi, Rei Takahashi, Hiroyuki Tezuka, Noriko Toyama-Sorimachi

2-F-WS11-01-O/P	Alveolar macrophages instruct CD103+CD8+ T <sub>RM</sub> cells formation via antigen cross-presentation  Takumi Kawasaki, Moe Ikegawa, Taro Kawai  Nara Institute of Science and Technology (NAIST), Ikoma, Japan
2-F-WS11-02-O/P	A novel therapeutic strategy of pulmonary fibrosis based on arginine metabolism in macrophages
	<ul> <li>Noriko Toyama-Sorimachi, Dat Nguyen-Tien, Toshihiko Kobayashi</li> <li>Department of Molecular Immunology and Inflammation, Research Institute, National Center for Global Health and Medicine</li> </ul>
2-F-WS11-03-O/P	Hyperactivation of STING-induced type I interferon pathway in dendritic cells from novel mice model for an autoinflammatory disease, COPA syndrome
	○ Takashi Kato¹), Takashi Orimo¹), Yuri Fukuda-Ohta¹), Sasaki Izumi¹), Hiroaki Hemmi¹,²), Yoshitaka Honda³,⁴,⁵), Kazushi Izawa⁵), Ryuta Nishikomori⁵), Tsuneyasu Kaisho¹)
	Department of Immunology, Institute of Advanced Medicine, Wakayama Medical University, Wakayama, Japan <sup>1)</sup> , Laboratory of Immunology, Faculty of Veterinary Medicine, Okayama University of Science, Imabari, Japan <sup>2)</sup> , Institute for the Advanced Study of Human Biology (ASHBi), Kyoto University, Kyoto, Japan <sup>3)</sup> , Department of Immunology, Kyoto University Graduate School of Medicine, Kyoto, Japan <sup>4)</sup> , Department of Pediatrics, Kyoto University Graduate School of Medicine, Kyoto, Japan <sup>5)</sup> , Department of Pediatrics and Child Health, Kurume University School of Medicine, Kurume, Japan <sup>6)</sup>
2-F-WS11-04-O/P	Loss of Rab7a in dendritic cells causes type 2 autoimmune hepatitis and primary biliary cholangitis
	Shin-Ichiroh Saitoh, Yoshiko-Mori Saitoh, Kensuke Miyake The Institute of Medical Science, The University of Tokyo, Tokyo, Japan
2-F-WS11-05-O/P	SIRP $\alpha$ supports the survival of dendritic cells by regulating the NF- $\kappa$ B activation
	Satomi Komori, Yasuyuki Saito, Respatika Datu, Takenori Kotani, Yoji Murata, Takashi Matozaki Division of Molecular and Cellular Signaling, Department of Biochemistry and Molecular Biology, Kobe University Graduate School of Medicine, Kobe, Japan
2-F-WS11-06-O/P	The effects of the gut lactic acid bacteria-generated metabolite 10-oxo- <i>cis</i> -6, <i>trans</i> -11-octadecadienoic acid on inflammatory responses <i>in vivo</i> and <i>in vitro</i>
	Naoki Kodama, Takuya Yashiro, Kazuki Nagata, Miki Ando, Chiharu Nishiyama Graduate School of Advanced Engineering, Department of Biological Science and Technology, Tokyo University of Science, Tokyo, Japan
2-F-WS11-07-O/P	Phosphorylated FROUNT regulates CCR2/5-mediated chemotactic signaling via the PI3KIA
	Ming Chen Chen <sup>1, 2)</sup> , Yuya Terashima <sup>1)</sup> , Etsuko Toda <sup>1, 3)</sup> , Seiichiroh Ohsako <sup>2)</sup> , Kouji Matsushima <sup>1)</sup> Division of Molecular Regulation of Inflammatory and Immune Diseases, Research Institute for Biomedical Science (RIBS), Tokyo University of Science, Tokyo, Japan <sup>1)</sup> , Laboratory of Microenvironmental and Metabolic Health Science, Department of Social Medicine, The University of Tokyo, Tokyo, Japan <sup>2)</sup> , Department of Analytic Human Pathology, Nippon Medical School, Tokyo, Japan <sup>3)</sup>
2-F-WS11-08-P	TYRO3 mediates exosome-borne antigen cross-presentation by dendritic cells
	○ Takashi Koyama, Nobuyuki Tanaka Division of Tumor Immunobiology, Miyagi Cancer Center Research Institute
2-F-WS11-09-P	Identification of TXP as a molecule involved in antigen cross-presentation
	<ul> <li>Moe Ikegawa, Takumi Kawasaki, Taro Kawai</li> <li>Molecular Immunology Lab. / Biological Science Dept., Nara Institute of Science and Technology</li> </ul>
2-F-WS11-10-P	The scaffold-dependent function of RIPK1 in dendritic cells promotes injury-induced colitis
	Kenta Moriwaki <sup>1)</sup> , Hiroyasu Nakano <sup>1)</sup> , Francis Chan <sup>2)</sup> Department of Biochemistry, Toho University School of Medicine, Tokyo, Japan <sup>1)</sup> , Department of Immunology, Duke University School of Medicine, North Carolina, USA <sup>2)</sup>

	Langerhans cell-like dendritic cells after stimulation with Toll-like receptor ligands  Rei Takahashi, Sanju Iwamoto, Toshihiro Tanioka, Kohei Maeda
	Showa University School of Pharmacy, Tokyo, Japan
2-F-WS11-12-P	The effects of short-chain fatty acids on the development and gene expression of dendritic cells
	<ul> <li>Weiting Zhao, Kazuki Nagata, Takuya Yashiro, Chiharu Nishiyama</li> <li>Graduate School of Advanced Engineering, Department of Biological Science and Technology, Tokyo University of Science, Tokyo, Japan</li> </ul>
2-F-WS11-13-P	Impaired development of myeloid cells in proteasome subunit mutant mice
	☐ Hiroaki Hemmi <sup>1, 2)</sup> , Takashi Orimo <sup>2)</sup> , Izumi Sasaki <sup>2)</sup> , Takashi Kato <sup>2)</sup> , Yuri Fukuda-Ohta <sup>2)</sup> , Noriko Kinjo <sup>3)</sup> , Hidenori Ohnishi <sup>4)</sup> , Nobuo Kanazawa <sup>5, 6)</sup> , Tsuneyasu Kaisho <sup>2)</sup>

### **December 9**

### WS14 B cell- B cell differentiation and anti-SARS-CoV-2 antibody responses

Discussers: Yoshihiro Baba, Masaki Hikida, Michelle Sue Jann Lee, Saya Moriyama, Kyoko Ochiai, Ryota Otsubo, Yoshimasa Takahashi, Hidetaka Tanno, Takeshi Tsubata

### 2-C-WS14-01-O/P

Conserved two E-box sequences neighboring the Rag1-promoter is critically required for the initiation of Rag1 gene expression upon T and B cell lineage commitment; Distinct gene regulation mediated by enhancers and promoter for adaptive immunity

Masaki Miyazaki, Hiroshi Kawamoto, Kazuko Miyazaki Institute for Frontier Medical and Life Sciences, Kyoto University

#### 2-C-WS14-02-O/P

### A single microRNA miR-195 rescues EBF1 deficiency in B cell differentiation

○ Yuji Miyatake¹¹, Tomokatsu Ikawa²¹, Ken-ichi Hirano³, Katsuto Hozumi³, Tomohiro Kurosaki⁴,⁵, Kiyoshi Ando⁶, Hiroshi Kawamoto⁻¹, Ai Kotani¹¹

Department of Advanced Medical Science, Tokai University School of Medicine, Isehara, Japan<sup>1)</sup>, RIKEN Research Center for Allergy and Immunology, Yokohama, Japan<sup>2)</sup>, Department of Immunology, Tokai University School of Medicine, Isehara, Japan<sup>3)</sup>, Laboratory for Lymphocyte Differentiation, RIKEN Center for Integrative Medical Sciences, Yokohama, Japan<sup>4)</sup>, Laboratory for Lymphocyte Differentiation, WPI Immunology Frontier Research Center and Graduate School of Frontier Biosciences, Osaka University, Suita, Japan<sup>5)</sup>, Department of Hematology, Tokai University School of Medicine, Isehara, Japan<sup>6)</sup>, Department of Immunology, Institute for Frontier Life and Medical Science, Kyoto University, Kyoto, Japan<sup>7)</sup>

### 2-C-WS14-03-P

### Investigation of B cell differentiation on atopic dermatitis model mice

O Moeko Ohara, Miyoko Matsushima, Hikaru Tsuzuki, Goki Inoue, Ko Iwaki, Yuki Hayashi, Teppei Yamashita, Tsutomu Kawabe

Department of Integrated Health Sciences, Nagoya University, Graduate School of Medicine

### 2-C-WS14-04-O/P

### The contributions of IL-1 receptor accessory protein to T-cell-independent type 2 responses

Mari Tenno, Tang Xuyang, Saori Fukao, Kei Haniuda, Daisuke Kitamura

Division of Cancer Cell Biology, Research Institute for Biomedical Sciences (RIBS) Tokyo University of Science

### 2-C-WS14-05-P

### Study of the role of IL-9 in the T cell-independent immune responses

○ Takumi Umezu, Kei Kato, Daisuke Kitamura

Research Institute for Biomedical Sciences, Tokyo University of sciences, Chiba, Japan

### 2-C-WS14-06-O/P

### Differential roles of RUBCN isoforms in the fate decision of germinal center B cells

Chaoyuan Tsai, Shuhei Sakakibara, Hitoshi Kikutani

Laboratory of Immune Regulation, Immunology Frontier Research Cnter, Osaka University, Osaka, Japan

#### 2-C-WS14-07-P

### Identification of a B cell intrinsic factor essential for germinal center differentiation

D'Alessandro-Gabazza<sup>2</sup>, Yutaka Yano<sup>1</sup>, Esteban C. Gabazza<sup>2</sup></li> </ul>
	Diabetes and Endocrinology, Mie University Hospital, Mie, Japan <sup>1)</sup> , Department of Immunology, Mie University Graduate School of Medicine,
	Mie, Japan <sup>2)</sup>
3-C-WS19-29-P	The physiological significances of membrane-bound and soluble forms of RANKL in bone and lymph
	node development
	○ Takuya Sugita¹¹, Kazuo Okamoto²¹, Takeshi Nitta¹¹, Hiroshi Takayanagi¹¹
	Department of Immunology, Graduate School of Medicine and Faculty of Medicine, The University of Tokyo <sup>1)</sup> , Department of Osteoimmunology, Graduate School of Medicine and Faculty of Medicine, The University of Tokyo <sup>2)</sup>
December <sup>1</sup>	10
WS20 T cell of	development and function
	hin Akiyama, Hiroyuki Hosokawa, Koichi Ikuta, Kiyokazu Kakugawa, Takeshi Kawabe, oko Kimura, Kota Kokubo, Takeshi Nitta, Harumi Suzuki
3-D-WS20-01-O/P	Notch family members cooperate to drive early T cell development via direct and indirect regulation of stage-specific target genes
	Hiroyuki Hosokawa     Department of Immunology, Tokai University School of Medicine
3-D-WS20-02-O/P	The Synergic Role of E2A and Notch signaling in T cell lineage-specific enhancer regulome
	<ul> <li>Kazuko Miyazaki, Hiroshi Kawamoto, Masaki Miyazaki</li> <li>Institute for Frontier Medical and Life Sciences, Kyoto University</li> </ul>
3-D-WS20-03-P	A critical role of transient receptor melastatin 7 in early T cell development
	○ Masatsugu Oh-hora, Takehiko Yokomizo
	Juntendo University, School of Medicine, Department of Biochemistry, Tokyo, Japan
3-D-WS20-04-P	Runx1 and Runx3 drive progenitor to T-lineage transcriptome conversion in mouse T-cell commitment via
	dynamic genomic site switching
	○ Yuichi Kama, Hiroyuki Hosokawa
	Department of Immunology, Tokai University School of Medicine, Kanagawa, Japan
3-D-WS20-05-P	Early T cell progenitor-derived antigen-presenting cells contribute to T cell repertoire selection in the thymus
	○ Haruka Wada, Ryo Otsuka, Ken-chiro Seino
	Dividion of Immunobiology, Institute for Genetic Medicine, Hokkaido University
3-D-WS20-06-P	Lmo2/Zbtb1/Cbfa2t3 complex maintains potential to differentiate into T-lineage in hematopoietic stem and progenitor cells
	Maria Koizumi, Ken-ichi Hirano, Katsuto Hozumi, Hiroyuki Hosokawa     Department of Immunology, Tokai University School of Medicine
3-D-WS20-07-P	LMO2 is essential to maintain the ability of progenitors to differentiate into T-cell lineage
	Department of Immunology, Tokai University School of Medicine
3-D-WS20-08-O/P	Dynamic THEMIS subcellular localization is essential for its function
	○ Kiyokazu Kakugawa Hilde Cheroutre

Riken, IMS, Laboratory for Immune Crosstalk

3-D-WS20-09-O/P	Phosphorylation of the last tyrosine residue regulates Runx1 function during T cell development
	Chihiro Ogawa <sup>1)</sup> , Satoshi Kojo <sup>1, 2)</sup> , Kazuki Okuyama <sup>1)</sup> , Sawako Muroi <sup>1)</sup> , Ichiro Taniuchi <sup>1)</sup> Laboratory for Transcriptional Regulation, RIKEN Center for Integrative Medical Sciences, Kanagawa, Japan <sup>1)</sup> , Division of Mucosal Immunology, Research Center for Systems Immunology, Medical Institute of Bioregulation, Kyushu University, Fukuoka, Japan <sup>2)</sup>
3-D-WS20-10-P	Promiscuous Gene Regulators for Central Immune Tolerance
	O Hiroyuki Takaba, Yoshihiko Tomofuji, Hiroshi Takayanagi The University of Tokyo, The Graduate School of Medicine and Faculty of Medicine, The Department of Immunology, Tokyo, Japan
3-D-WS20-11-P	Satb1 regulates thymocyte trafficking after positive selection
	<ul> <li>Taku Naito, Yuriko Tanaka, Taku Kuwabara, Marii Ise, Motonari Kondo</li> <li>Dept of Molecular Immunology, Toho University School of Medicine</li> </ul>
3-D-WS20-12-P	The CCR4-NOT deadenylase complex safeguards thymic positive selection by down-regulating aberrant
	pro-apoptotic gene expression
	○ Taku Kureha <sup>1, 2</sup> ), Takahisa Miyao <sup>3</sup> ), Taishin Akiyama <sup>3</sup> ), Tadashi Yamamoto <sup>1, 3</sup> ) Cell Signal Unit, Okinawa Institute of Science and Technology Graduate University, Onna Okinawa, Japan. <sup>1</sup> ), Institute for Immunology, Biomedical Center, Ludwig-Maximilians-Universität München, Planegg-Martinsried, Germany <sup>2</sup> , Laboratory for Immune Homeostasis, RIKEN Center for Integrative Medical Sciences, Yokohama, Japan. <sup>3</sup> )
3-D-WS20-13-P	Roles of RNA splicing of the <i>Cbfb</i> gene in fine-tuning of <i>Cbfb</i> protein amount during embryonic immune cell development
	○ Jiawen Zheng, Chengcheng Zou, Kazuki Okuyama, Jingjie Chang, Ichiro Taniuchi Laboratory for Transcriptional Regulation, IMS, RIKEN Yokohama, Japan
3-D-WS20-14-O/P	IL-12 derived from type 1 dendritic cells tonically promotes the differentiation of innate T-bethigh memory-
	phenotype CD4 <sup>+</sup> T lymphocytes in steady state
	○ Takeshi Kawabe <sup>1, 2)</sup> , Jaeu Yi <sup>3, 4)</sup> , Akihisa Kawajiri <sup>1)</sup> , Kerry Hilligan <sup>2)</sup> , Difeng Fang <sup>5)</sup> , Naoto Ishii <sup>1)</sup> , Hidehiro Yamane <sup>6)</sup> , Jinfang Zhu <sup>5)</sup> , Dragana Jankovic <sup>2)</sup> , Kwang Soon Kim <sup>3, 4)</sup> , Giorgio Trinchieri <sup>7)</sup> , Alan Sher <sup>2)</sup> Department of Microbiology and Immunology, Tohoku University Graduate School of Medicine, Sendai, Miyagi, Japan. <sup>1)</sup> , Immunobiology Section, Laboratory of Parasitic Diseases, National Institute of Allergy and Infectious Diseases (NIAID), National Institutes of Health (NIH), Bethesda, MD, USA. <sup>2)</sup> , Academy of Immunology and Microbiology, Institute for Basic Science, Pohang, Republic of Korea. <sup>3)</sup> , Department of Integrative Biosciences and Biotechnology, Pohang University of Science and Technology, Pohang, Republic of Korea. <sup>4)</sup> , Molecular and Cellular Immunoregulation Section, Laboratory of Immune System Biology, NIAID, NIH, Bethesda, MD, USA. <sup>5)</sup> , Laboratory of Cellular and Molecular Biology, Center for Cancer Research (CCR), National Cancer Institute (NCI), NIH, Bethesda, MD, USA. <sup>6)</sup> , Cancer and Inflammation Program, CCR, NCI, NIH, Bethesda, MD, USA. <sup>7)</sup>
3-D-WS20-15-P	Single-cell RNA sequencing analysis reveals heterogeneity of memory CD8 T cells and unbiased impact
	of MHC class II-deficiency on memory CD8 T cell subpopulations
	Ruka Setoguchi, Shohei Hori Laboratory for Immunology and Microbiology, Graduate School of Pharmaceutical Sciences, The University of Tokyo
3-D-WS20-16-O/P	Bone marrow and splenic memory CD4 T cells are differently maintained in terms of cytokine signals, cell adhesion and cellular metabolism
	Uki Kimura <sup>1)</sup> , Mathias Mursell <sup>2)</sup> , Sano Nagano <sup>1)</sup> , Koji Tokoyoda <sup>1, 2)</sup> Division of Immunology, School of Life Science, Faculty of Medicine, Tottori University, Tottori, Japan. <sup>1)</sup> , Deutsches Rheuma-Forschungszentrum Berlin, Leibniz Institute, Berlin, Germany. <sup>2)</sup>
3-D-WS20-17-P	Antigen priming of conventional dendritic cell 1 preferentially guides the differentiation of resting
	memory CD4 T cells
	Cana Matsuo <sup>1)</sup> , Shintaro Hojyo <sup>2)</sup> , Miya Yoshino <sup>1)</sup> , Koji Tokoyoda <sup>1)</sup> Division of Immunology, School of Life Science, Faculty of Medicine, Tottori University <sup>1)</sup> , Division of Molecular Psychoimmunology, Institute for Genetic Medicine, Hokkaido University <sup>2)</sup>
3-D-WS20-18-P	The Death Assay; a method to induce memory-like T cells in culture
	○ Yasuhito Tokumoto¹¹, Yasuto Araki²¹  Admission Center, Saitama Medical University, Saitama, Japan¹¹, Department of Rheumatology and Applied Immunology, Faculty of Medicine, Saitama Medical University, Saitama, Japan²¹

3-D-WS20-19-O/P	Durable and Diverse Memory T Cell Responses against Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2)  Masanori Isogawa, Kazutaka Terahara, Yu Adachi, Keisuke Tonouchi, Saya Moriyama, Ryutaro Iwabuchi, Tomohiro Takano, Ayae Nishiyama, Lin Sun, Taishi Onodera, Takayuki Matsumura, Yoshimasa Takahashi Research Center for Drug and Vaccine Development, National Institute of Infectious Diseases, Tokyo, Japan
3-D-WS20-20-P	Transient IL-27 blockade enhances CD4 <sup>+</sup> T cell memory and protection against malaria  Maria Lourdes Macalinao <sup>1, 2)</sup> , Shin-ichi Inoue <sup>3)</sup> , Sanjaadorj Tsogtsaikhan <sup>3)</sup> , Ganchimeg Bayarsaikhan <sup>3)</sup> ,  Jiun-Yu Jian <sup>3)</sup> , Kazumi Kimura <sup>3)</sup> , Julius Clemence Hafalla <sup>2)</sup> , Hiroki Yoshida <sup>4)</sup> , Daisuke Kimura <sup>3)</sup> , Katsuyuki Yui <sup>1, 3, 5)</sup> School of Tropical Medicine and Global Health, Nagasaki University, Nagasaki, Japan <sup>1)</sup> , Department of Infection Biology, Faculty of Infectious and Tropical Diseases, London School of Hygiene and Tropical Medicine, United Kingdom <sup>2)</sup> , Division of Immunology, Department of Molecular Microbiology and Immunology, Graduate School of Biomedical Sciences, Nagasaki University, Nagasaki, Japan <sup>3)</sup> , Division of Molecular and Cellular Immunoscience, Department of Biomolecular Sciences, Faculty of Medicine, Saga University, Saga, Japan <sup>4)</sup> , Institute of Tropical Medicine, Nagasaki University, Nagasaki, Japan <sup>5)</sup>
3-D-WS20-21-P	CD8 <sup>+</sup> tissue-resident memory T cells promote liver fibrosis resolution by inducing apoptosis of hepatic stellate cells  Nobuhiro Nakamoto, Yuzo Koda, Takanori Kanai Department of Gastroenterology and Hepatology, Keio University School of Medicine
3-D-WS20-22-P	Repeated exposure to Aspergillus fumigatus induces airway inflammation and fibrosis through the formation of tissue-resident memory CD4 <sup>+</sup> T cells  Kota Kokubo, Masahiro Kiuchi, Shoko Kuriyama, Chiaki Iwamura, Kiyoshi Hirahara, Toshinori Nakayama Department of Immunology, Graduate School of Medicine, Chiba University, Chuo-ku, Chiba, Japan
3-D-WS20-23-O/P	Rejuvenating effector/exhausted CAR-T cells to stem cell memory-like CAR-T cells by resting them in the presence of CXCL12 and the NOTCH ligand  Makoto Ando, Akihiko Yoshimura  Department of Microbiology and Immunology, Keio University School of Medicine, Tokyo, Japan
3-D-WS20-24-P	Effector vs memory-like CD8 T cell fate is determined at secondary antigen stimulation after the priming  Yu Gong  Research institute for Biomedical Science, Tokyo University of Science, Chiba, Japan
3-D-WS20-25-P	CD83 marks progenitor exhausted T cell population  Zhiwen Wu <sup>1)</sup> , Toshiaki Yoshikawa <sup>1)</sup> , Satoshi Inoue <sup>1)</sup> , Hirokazu Matsushita <sup>2)</sup> , Shiro Suzuki <sup>3)</sup> , Yuki Kagoya <sup>1)</sup> Division of Immune Response, Aichi Cancer Center Research Institute, Nagoya, Japan <sup>1)</sup> , Division of Translational Oncoimmunology, Aichi

### WS21 Macrophage in inflammation and diseases

Discussers: Tsuneyasu Kaisho, Jun Kasamatsu, Masako Kohyama, Kensuke Miyake, Chigusa Nakahashi-Oda, Nobuyuki Onai, Izumi Sasaki, Tomohiko Tamura

### 3-E-WS21-01-O/P

An endoplasmic reticulum stress sensor IRE1 $\alpha$  is involved in cholera toxin-induced interleukin-1 $\beta$  production from resident peritoneal macrophages

○ Izumi Sasaki¹¹, Yuri Fukuda-Ohta¹¹, Shuhei Morita²¹, Daisuke Okuzaki³³, Takashi Kato¹¹, Takashi Orimo¹¹, Koichi Furukawa⁴, Tsuneyasu Kaisho¹¹

Cancer Center Research Institute, Nagoya, Japan<sup>2)</sup>, Department of Gynecologic Oncology, Aichi Cancer Center, Nagoya, Japan<sup>3)</sup>

Department of Immunology, Institute of Advanced Medicine, Wakayama Medical University, Wakayama, Japan<sup>1)</sup>, First Department of Medicine, Wakayama Medical University, Wakayama, Japan <sup>2)</sup>, Genome Information Research Center, Research Institute for Microbial Diseases, Osaka University, Suita, Japan<sup>3)</sup>, Department of Lifelong Sports and Health Sciences, Chubu University College of Life and Health Sciences, Kasugai, Japan<sup>4)</sup>

3-E-WS21-02-O/P	Unexpected role of atypical cyclin in mediating macrophage functionality via metabolic regulation
	<ul> <li>Yee Kien Chong, Osamu Takeuchi</li> <li>Department of Medical Chemistry, Graduate school of Medicine, Kyoto University</li> </ul>
3-E-WS21-03-O/P	Deciphering the role of Regnase-1 in the pathophysiology of pulmonary arterial hypertension
	Ai Yaku <sup>1, 2)</sup> , Yusuke Manabe <sup>3, 4)</sup> , Osamu Takeuchi <sup>1)</sup> Department of Medical Chemistry, Kyoto University Graduate School of Medicine, Kyoto, Japan. <sup>1)</sup> , Department of Rheumatology and Clinical Immunology, Kyoto University Graduate School of Medicine, Kyoto, Japan. <sup>2)</sup> , Department of Vascular Physiology, Research Institute National Cerebral and Cardiovascular Center, Osaka, Japan. <sup>3)</sup> , Department of Respiratory Medicine, Allergy and Rheumatic diseases, Osaka University Graduate School of Medicine, Osaka, Japan. <sup>4)</sup>
3-E-WS21-04-O/P	Analysis of M2 macrophage polarization regulated by transglutaminase 2 in kidney fibrosis
	<ul> <li>Yoshiki Shinoda, Hideki Tatsukawa, Kiyotaka Hitomi</li> <li>Cellular Biochemistry Lab., Graduate School of Pharmaceutical Sciences, Nagoya University, Tokai National Higher Education and Research System, Nagoya, Japan</li> </ul>
3-E-WS21-05-O/P	The role of an immune-inhibitory receptor CD300a in acute renal ischemia-reperfusion
	<ul> <li>Hitoshi Koizumi, Chigusa Nakahashi-Oda, akira shibuya</li> <li>Department of Immunology, Faculty of Medicine, University of Tsukuba, Tsukuba, Japan</li> </ul>
3-E-WS21-06-O/P	Placenta-expressed transcript-1, a novel immunosuppressive molecule, inhibits inflammatory cytokine
	production during bacterial infection  Jun Kasamatsu <sup>1)</sup> , Hiroki Iwaoka <sup>2)</sup> , Ko Sato <sup>2)</sup> , Hiromasa Tanno <sup>3)</sup> , Emiko Kanno <sup>3)</sup> , Keiko Ishii <sup>2)</sup> , Kazuyoshi Kawakami <sup>1, 2)</sup> Department of Intelligent Network for Infection Control, Tohoku University Graduate School of Medicine, Sendai, Miyagi, Japan <sup>1)</sup> , Department of Medical Microbiology, Mycology, and Immunology, Tohoku University Graduate School of Medicine, Sendai, Miyagi, Japan <sup>2)</sup> , Department of Science of Nursing Practice, Tohoku University Graduate School of Medicine, Sendai, Miyagi, Japan <sup>3)</sup>
3-E-WS21-07-O/P	Basophils promote the generation of highly phagocytic M2 macrophages which dampen excess
	inflammation at the resolution phase of allergic inflammation  Kensuke Miyake <sup>1)</sup> , Kazufusa Takahashi <sup>1)</sup> , Junya Ito <sup>1)</sup> , Jun Nakabayashi <sup>2)</sup> , Shigeyuki Shichino <sup>3)</sup> , Soichiro Yoshikawa <sup>1,4)</sup> , Hajime Karasuyama <sup>1)</sup> Advanced Research Institute, Tokyo Medical and Dental University (TMDU) <sup>1)</sup> , College of Liberal Arts and Sciences, Tokyo Medical and Dental University (TMDU) <sup>2)</sup> , Research Institute of Biomedical Sciences, Tokyo University of Science <sup>3)</sup> , Department of Cellular Physiology, Okayama University <sup>4)</sup>
3-E-WS21-08-O/P	U1 RNP can induce NETosis to isolated mouse neutrophils through NOX2 independent pathway
	○ Emiko Takeuchi <sup>1)</sup> , Makoto Otsu <sup>2)</sup> , Yasuo Takeuchi <sup>3)</sup> , Kazuya Iwabuchi <sup>1)</sup> Department of Immunology, Kitasato University School of Medicine, Kanagawa Japan <sup>1)</sup> , Department of transfusion and cell transplant, Kitasato University School Of Medicine <sup>2)</sup> , Department of Nephrology, Kitasato University School of Medicine <sup>3)</sup>
3-E-WS21-09-P	M-CSF/IL-34-differentiated bone marrow cells mimic microglia cells and metallochionein is important roles for endocytosis of amyloid $\beta$ 42
	<ul> <li>Yasuhiro Yoshida, Yusuke Sennari</li> <li>University of Occupational and Environmental Health, Japan</li> </ul>
3-E-WS21-10-P	Resident macrophages give rise to spatial heterogeneity of immune responses in the liver  Yu Miyamoto, Junichi Kikuta, Masaru Ishii  Department of Immunology and Cell Biology, Osaka University Graduate School of Medicine, Osaka, Japan
3-E-WS21-11-P	Transcriptional mechanisms responsible for functional alteration of microglia in aging and AD  Shun Ishikawa <sup>1,2)</sup> , Taku Sato <sup>1)</sup> , Toshiaki Ohteki <sup>1)</sup> Department of Biodefense Research, Medical Research Institute, Tokyo Medical and Dental University <sup>1)</sup> , JSPS Research Fellowship for Young Scientists(DC2) <sup>2)</sup>
3-E-WS21-12-P	Immune checkpoint gp49B tethers fibronectin with integrins on macrophage cell surface
	○ So Itoi¹¹, Shota Endo¹¹, Mei-Tzu Su¹¹, Yuzuru Sakamoto²¹, Toshiyuki Takai¹¹ Department of Experimental Immunology, Institute of Development, Aging and Cancer, Tohoku University, Sendai, Japan¹¹, Department of Human Science, Faculty of Liberal Arts, Tohoku Gakuin University, Sendai, Japan²¹

3-E-WS21-13-P	Effects on function of macrophages by diazinon-modified metabolic status
	○ Ko Iwaki, Miyoko Matsushima, Goki Inoue, Yuki Hayashi, Teppei Yamashita, Moeko Ohara, Hikaru Tsuzuki, Tsutomu Kawabe
	Department of Integrated Health Sciences, Nagoya University Graduate School of Medicine
3-E-WS21-14-P	Carboplatin-mediated recovery of LPS-induced tolerant macrophages via p53/cell cycle pathway
	Atsadang Boonmee <sup>1)</sup> , Salisa Benjaskulluecha <sup>2)</sup> , Patipark Kueanjinda <sup>3)</sup> , Benjawan Wongprom <sup>1)</sup> , Thitiporn Pattarakankul <sup>1)</sup> , Tanapat Palaga <sup>1, 2, 4)</sup> Department of Microbiology, Faculty of Science, Chulalongkorn University, Bangkok, Thailand <sup>1)</sup> , Inter-disciplinary Graduate Program in Medical Microbiology, Graduate School, Chulalongkorn University, Bangkok, Thailand <sup>2)</sup> , Department of Microbiology, Faculty of Medicine, Chulalongkorn University, Bangkok, Thailand <sup>3)</sup> , Center of Excellence in Immunology and Immune-mediated Diseases, Chulalongkorn University, Bangkok Thailand <sup>4)</sup>
3-E-WS21-15-P	Analysis of liver macrophage subsets during the development of a newly established dietary model of non-alcoholic steatohepatitis, "3-F mice"
	Yuki Tada <sup>1)</sup> , Kaichi Kasai <sup>1)</sup> , Koichi Tsuneyama <sup>2)</sup> , Yoshinori Nagai <sup>1)</sup> Department of Pharmaceutical Engineering, Faculty of Engineering, Toyama Prefectural University <sup>1)</sup> , Department of Pathology and Laboratory Medicine, Tokushima University Graduate School <sup>2)</sup>
3-E-WS21-16-P	Specific increase in joint neutrophil extracellular traps and its attenuation by interleukin-6 inhibition in autoimmune arthritis
	O Ayako Ohyama, Tamaki Iwai, Taihei Nishiyama, Yuya Kondo, Hiroto Tsuboi, Isao Matsumoto Division of Rheumatology, Department of Internal Medicine, Faculty of Medicine, University of Tsukuba
3-E-WS21-17-P	IKK inhibitor can inhibit both neutrophil and macrophage endocytosis of particulate matter
	Duo Wang <sup>1)</sup> , Yasuhiro Yoshida <sup>2)</sup> Department of Radiobiology and Hygiene Management, Institute of Industrial Ecological Sciences, University of Occupational and Environmental Health, Japan, Kitakyushu, Japan <sup>1)</sup> , Department of Immunology and Parasitology, School of Medicine, University of Occupational and Environmental Health, Japan, Kitakyushu, Japan <sup>2)</sup>
3-E-WS21-18-P	Induction of IL-12 from murine macrophages by intact particulate cell wall of Lactobacillus plantarum through cell wall teichoic acid-dependent phagocytosis
	Shin Hosokawa, Naoya Kojima Applied Biochemistry, The University of Tokai, Kanagawa, Japan
3-E-WS21-19-P	Pulmonary Immune Response and Molecular Mechanism of Fibrosis by Inhalation Exposure to Nanomaterials
	Yuhji Taquahashi <sup>1)</sup> , Takaaki Tsunematsu <sup>2)</sup> , Jun Kanno <sup>1)</sup> , Naozumi Ishimaru <sup>2)</sup> , O Rieko Arakaki <sup>2)</sup> Division of Cellular Molecular Toxicology, National institute of Health Sciences <sup>1)</sup> , Department of Oral Molecular Pathology, Tokushima University Graduate School of Biomedical Sciences <sup>2)</sup>
3-E-WS21-20-P	Analysis of efferocytosis on type 2-skewed immune responses in NC/Nga mice
	<ul> <li>Teppei Yamashita, Miyoko Matsushima, Goki Inoue, Ko Iwaki, Yuki Hayashi, Moeko Ohara, Hikaru Tsuzuki,</li> <li>Tsutomu Kawabe</li> <li>Department of Integrated Health Sciences, Nagoya University Graduate School of Medicine</li> </ul>
3-E-WS21-21-P	Enhanced efferocytosis by macrophages ameliorates neuronal deficit in CD300a-deficient mice after ischemic stroke
	○ Chigusa Nakahashi-Oda¹¹, Yuta Nakazawa¹¹, Kazumasa Kanemaru¹¹, Yaqiu Wang¹¹, Takashi Shichita²¹, Jiro Kitaura³¹, Akira Shibuya¹¹

WS22 Huma Discussers: Ke Bu 3-F-WS22-01-O/P	an Immunology ishi Fujio, Kouyuki Hirayasu, Masahiro Kitabatake, Tomoyuki Mukai, Shingo Nakayamada, nki Natsumoto, Ryuta Nishikomori, Kazuhiko Yamamoto, Satoshi Yamasaki  JAK inhibitor downregulates the expression of NOD2 induced by IFN-γ; a possible therapeutic strategy for Blau syndrome  Riko Ito¹¹, Naotomo Kambe¹¹, Megumu Saito²¹, Kenji Kabashima¹¹ Department of Dermatology, Kyoto University Graduate School of Medicine, Kyoto¹¹, Department of Clinical Application, Center for iPS cell research and application (CiRA), Kyoto University, Kyoto²¹  T- and B-cell abnormalities associated with an IKZF3 miss-sense mutation  Jingjie Chang¹¹, Hye Sun Kuehn²², Junji Harada¹¹, Chengcheng Zou¹¹, Kazuki Okuyama¹¹, Sergio D Rosenzweig²², Ichiro Taniuchi¹¹ Laboratory For Transcriptional Regulation, RIKEN Center For Integrative Medical Sciences, Kanagawa, Japan¹³, Immunology Service, Departmer of Laboratory Medicine, Clinical Center, NIH, Maryland, Bethesda, USA²¹  Investigation of host-derived proteins in gastrointestinal fluid of infants with DIA-MS-based proteomic analysis  Tomo Kakihara¹¹, Eiichiro Watanabe²¹ Department Of Pediatric Surgery, Faculty Of Medicine, University Of Tokyo, Bunkyo-ku, Tokyo, Japan¹¹, Division Of Surgery, National Center For Department Of Pediatric Surgery, Faculty Of Medicine, University Of Tokyo, Bunkyo-ku, Tokyo, Japan¹¹, Division Of Surgery, National Center For Department Of Pediatric Surgery, Faculty Of Medicine, University Of Tokyo, Bunkyo-ku, Tokyo, Japan¹¹, Division Of Surgery, Faculty Of Medicine, University Of Tokyo, B

3-F-WS22-05-O/P	Functional analysis of rare variants associated with SLE using patients derived iPS cells
	O Bunki Natsumoto <sup>1)</sup> , Hirofumi Shoda <sup>1)</sup> , Yasuo Nagafuchi <sup>1)</sup> , Makoto Otsu <sup>2)</sup> , Kazuhiko Yamamoto <sup>3)</sup> , Hideki Taniguchi <sup>4)</sup> , Keishi Fujio <sup>1)</sup>
	Department of Allergy and Rheumatology, Graduate School of Medicine, The University of Tokyo, Tokyo, Japan. <sup>1)</sup> , Department of Transfusion and Cell Transplantation, Kitasato University School of Medicine. <sup>2)</sup> , Laboratory for Autoimmune Diseases, Center for Integrative Medical Sciences, RIKEN, Yokohama, Japan. <sup>3)</sup> , Division of Stem Cell Processing/Stem Cell Bank, Center for Stem Cell Biology and Regenerative Medicine, Institute of Medical Science, The University of Tokyo, Tokyo, Japan. <sup>4)</sup>
3-F-WS22-06-O/P	Control of naive and effector CD4 T cell receptor repertoires by rheumatoid-arthritis-risk HLA alleles
	Yasuo Nagafuchi <sup>1, 2)</sup> , Mineto Ota <sup>1, 2)</sup> , Hiroaki Hatano <sup>1)</sup> , Mariko Inoue <sup>1)</sup> , Masahiro Nakano <sup>1)</sup> , Saeko Yamada <sup>1)</sup> , Ryochi Yoshida <sup>1)</sup> , Hirofumi Shoda <sup>1)</sup> , Yukinori Okada <sup>3)</sup> , Kazuhiko Yamamoto <sup>1, 4)</sup> , Tomohisa Okamura <sup>1, 2)</sup> , Keishi Fujio <sup>1)</sup> Department of Allergy and Rheumatology, Graduate School of Medicine, The University of Tokyo <sup>1)</sup> , Department of Functional Genomics and Immunological Diseases, Graduate School of Medicine, The University of Tokyo <sup>2)</sup> , Department of Statistical Genetics, Osaka University Graduate School of Medicine <sup>3)</sup> , Laboratory for Autoimmune Diseases, RIKEN Center for Integrative Medical Sciences <sup>4)</sup>
3-F-WS22-07-O/P	Genetic diversity of immune receptors <i>LILRB3</i> and <i>LILRA6</i> suggests their interaction with bacteria
	○ Kouyuki Hirayasu¹¹, Rikinari Hanayama¹.²² Advanced Preventive Medical Sciences Research Center, Kanazawa University, Ishikawa, Japan¹¹, WPI Nano Life Science Institute (NanoLSI), Kanazawa University, Ishikawa, Japan²¹
3-F-WS22-08-O/P	Broad neutralization activity of SARS-CoV-2 antibody is achieved by coordinated recognition of virus
	vulnerable site  Taishi Onodera <sup>1)</sup> , Yu Adachi <sup>1)</sup> , Saya Moriyama <sup>1)</sup> , Takeshi Inoue <sup>2)</sup> , Shuuhei Sakakibara <sup>3)</sup> , Keisuke Tonouchi <sup>1)</sup> ,
	Lin Sun <sup>1</sup> ), Mitsuo Oshimura <sup>4</sup> ), Tomohiro Kurosaki <sup>2</sup> ), Katsumi Maenaka <sup>5</sup> ), Yoshimasa Takahashi <sup>1</sup> ) Reseach center for drug and vaccine development, National institute of Infectious Diseases <sup>1</sup> ), Laboratory of Lymphocyte Differentiation, WPI Immunology Frontier Research Center, Osaka University <sup>2</sup> , Laboratory of Immune Regulation, WPI Immunology Frontier Research Center, Osaka University <sup>3</sup> , Trans Chromosomics Inc.; Tottori <sup>4</sup> ), Laboratory of Biomolecular Science, and Center for Research and Education on Drug Discovery, Faculty of Pharmaceutical Sciences, Hokkaido University <sup>5</sup> )
3-F-WS22-09-P	Within-year variation in human T-cell receptor repertoire and the influence of extrinsic factors on it
	O Ayaka Maki, Tomoaki Naito, Tetsuji Hori, Satoshi Matsumoto Yakult Central Institute, Tokyo, Japan
3-F-WS22-10-P	Analysis of disease-associated SNPs and inflammatory mechanisms in Dupuytren's contracture
	○ Hiroaki Kida <sup>1,2)</sup> , Ikuko Takahashi <sup>1)</sup> , Yuichiro Matsui <sup>2)</sup> , Norimasa Iwasaki <sup>2)</sup> , Masaaki Murakami <sup>1)</sup> Molecular Psychoimmunology, Institute for Genetic Medicine, Graduate School of Medicine, Hokkaido University, Japan <sup>1)</sup> , Department of Orthopaedic Surgery, Faculty of Medicine and Graduate School of Medicine, Hokkaido University, Japan <sup>2)</sup>
3-F-WS22-11-P	A microbiome-derived peptide induces apoptosis of cells from different tissues
	<ul> <li>Yuko Okano<sup>1, 2</sup>), Atsuro Takeshita<sup>1, 2</sup>), Kota Nishihama<sup>1, 2</sup>), Valeria Fridman<sup>1</sup>), Taro Yasuma<sup>1, 2</sup>), Corina Gabazza<sup>1</sup>),</li> <li>Masaaki Toda<sup>1</sup>), Yutaka Yano<sup>2</sup>), Esteban Gabazza<sup>1</sup>)</li> <li>Department of Immunology Mie University<sup>1</sup>), Department of Diabetes and Endocrinology, Mie University<sup>2</sup>)</li> </ul>
3-F-WS22-12-P	Regulation of immune status by microRNAs in personalized vaccination and immunotherapy
	O Hidemitsu Kitamura <sup>1)</sup> , Junya Ohtake <sup>1,2)</sup> , Yosuke Ohno <sup>3)</sup> , Shigenori Homma <sup>3)</sup> , Akinobu Taketomi <sup>3)</sup> Division of Functional Immunology, Institute for Genetic Medicine, Hokkaido University <sup>1)</sup> , Center for Medical Sciences, St Luke's International University <sup>2)</sup> , Department of Gastroenterological Surgery I, Hokkaido University Graduate School of Medicine <sup>3)</sup>
3-F-WS22-13-P	Immunological features that determine the intensity of antibody responses to BNT162b2 mRNA vaccine
	against SARS-CoV-2  Takahiro Kageyama, Shigeru Tanaka, Tadamichi Kasuya, Taro Iwamoto, Kei Ikeda, Hiroshi Nakajima Department of Allergy and Clinical Immunology, Graduate School of Medicine, Chiba University
3-F-WS22-14-P	Aging and CMV Infection Affect Pre-existing SARS-CoV-2-Reactive CD8 <sup>+</sup> T Cells in Unexposed Individuals
	Norihide Jo <sup>1, 2)</sup> , Yoko Hamazaki <sup>1, 3)</sup> Department of Life Science Frontiers, Center for iPS Cell Research and Application (CiRA), Kyoto University, Kyoto, Japan <sup>1)</sup> , Alliance Laboratory for Advanced Medical Research, Graduate school of Medicine, Kyoto University, Kyoto, Japan <sup>2)</sup> , Laboratory of Immunobiology, Graduate school of Medicine, Kyoto University, Kyoto, Japan <sup>3)</sup>

3-F-WS22-15-P

# Protective effect of conditioned media of immortalized stem cells from human exfoliated deciduous teeth on the formation of acute pressure ulcers via HGF and VEGF

Yasuhiro Katahira, Shinya Inoue, Hideaki Hasegawa, Aruma Watanabe, Izuru Mizoguchi, Takayuki Yoshimoto Department of Immunoregulation, Institute of Medical Science, Tokyo Medical University

3-F-WS22-16-P

# A Therapeutic Strategy That Selectively Targets Human Monocyte Progenitors for Solid Cancers and Leukemias

O Yuta Izumi, Masashi Kanayama, Toshiaki Ohteki

Department of Biodefense Research, Medical Research Institute, Tokyo Medical and Dental University (TMDU), Tokyo, Japan.

# **Awards Ceremony and Lectures**

## **Awards Ceremony and Lectures**

### 12月8日 (水) Wednesday, 8<sup>th</sup> December

### 各賞授賞式・受賞講演

### **Awards Ceremony and Lectures**

### 第 24 回日本免疫学会賞授賞式 / 24<sup>th</sup> JSI Award Ceremony

### 第24回日本免疫学会賞受賞者

24th JSI Award Winner

### 「制御性T細胞による免疫制御機構の解明」

"Elucidation of the mechanisms underlying Foxp3+ regulatory T cell-dependent immune regulation"

堀 昌平 氏 (東京大学大学院 薬学系研究科免疫・微生物学教室)

Dr. Shohei Hori, The University of Tokyo

### 第8回日本免疫学会ヒト免疫研究賞授賞式/

8<sup>th</sup> JSI Human Immunology Research Award Ceremony

### 第8回日本免疫学会ヒト免疫研究賞受賞者

8<sup>th</sup> JSI Human Immunology Research Award Winner

### 「単一遺伝子異常症によるヒト免疫疾患の病態解明」

"Elucidation of molecular pathogenesis of human inborn errors of immunity"

森尾 友宏 氏 (東京医科歯科大学大学院 発生発達病態学分野)

Dr. Tomohiro Morio, Tokyo Medical and Dental University

### 第8回日本免疫学会女性免疫研究者賞授賞式/

8th JSI Women Immunologist Award Ceremony

### 第8回日本免疫学会女性免疫研究者賞受賞者

8<sup>th</sup> JSI Women Immunologist Award Winner

### 「T細胞の分化・活性化機構と疾患制御に関する研究」

"Clarification of T cell differentiation and activation mechanism and its application for disease control"

渋谷 和子 氏(筑波大学 医学医療系 免疫制御医学研究室)

Dr. Kazuko Shibuya, University of Tsukuba

※各種授賞式に引き続き、受賞講演を行います。

\*The above Award Lectures will be start following ceremonies.

### 第 16 回日本免疫学会研究奨励賞授賞式 / 16<sup>th</sup> JSI Young Investigator Award Ceremony

### 第 16 回日本免疫学会研究奨励賞受賞者(五十音順)

16<sup>th</sup> JSI Young Investigator Award Winners

### 「腸管上皮細胞が発現する Lypd8 による大腸恒常性維持機構の解明」

"Maintenance of colonic homeostasis by Lypd8 expressed on intestinal epithelial cells"

奥村 龍 氏 (大阪大学大学院医学系研究科 免疫制御学)

Dr. Ryu Okumura, Osaka University

### 「胸腺髄質上皮細胞による中枢性免疫寛容の成立機構」

"Ensuring the central immune tolerance by medullary thymic epithelial cells"

高場 啓之 氏(東京大学医学系研究科 免疫学)

Dr. Hiroyuki Takaba, The University of Tokyo

### 「Omics 解析を用いた炎症性腸疾患病態に関与する腸管粘膜免疫の機能解析」

"Omics data analysis of the intestinal mucosal immunity involved in the pathogenesis of inflammatory bowel diseases"

三上 洋平 氏(慶應義塾大学医学部消化器内科)

Dr. Yohei Mikami, Keio University

### 「炎症における RNA 制御の分子基盤」

"Molecular basis of post-transcriptional regulation in inflammation"

三野 享史 氏 (京都大学大学院医学研究科 医学専攻 分子生体統御学講座 医化学分野)

Dr. Takashi Mino, Kyoto University

### 「IL-4/IL-13 を中心としたアレルギー病態の解明」

"Understanding the pathogenesis of IL-4/IL-13-mediated allergic diseases"

本村 泰隆 氏 (大阪大学大学院医学系研究科 生体防御学)

Dr. Yasutaka Motomura, Osaka University

※研究奨励賞受賞者の研究課題については、12月8日(水)18時15分からポスター発表をいたします。

\*JSI Young Investigator Award, Winners' posters discussion will be started from 18:15 on 8th December.

### **International Immunology Outstanding Merit Award Ceremony**

### International Immunology Outstanding Merit Award for 2020 Winner

"Commensal-bacteria-derived butyrate promotes the T cell-independent IgA response in the colon"

Dr. Junya Isobe, Keio University

### 若手免疫学研究支援事業

### **Outstanding Young Immunology Researcher Award Winners Introduction**

### 2021 年若手免疫学研究支援事業受賞者(五十音順)

**Outstanding Young Immunology Researcher Award 2021 Winners** 

### 「脂肪酸代謝を基軸としたマルチパラメーター解析によるヒト記憶 T 前駆細胞の同定」

"Multi-parameter immunophenotyping based on heterogeneous fatty acid metabolism identifies human memory T cell precursor population"

遠藤 裕介 氏(公益財団法人かずさ DNA 研究所 オミックス医科学研究室)

Dr. Yusuke Endo. Kazusa DNA Research Institute

### 「腫瘍浸潤 PD-1 陽性制御性 T 細胞並びにネオ抗原特異的 T 細胞のバイオマーカー・治療標的への応用」

"PD-1+ regulatory T cell and neoantigen-specific T cell in the tumor microenvironment"

富樫 庸介 氏 (岡山大学学術研究院医歯薬学域 腫瘍微小環境学分野)

Dr. Yosuke Togashi, Okayama University

### 「ILC2 によるアレルギー体質形成機序の解明」

"Role of group 2 innate lymphoid cells in the formation of allergic constitution"

本村 泰隆 氏 (大阪大学大学院医学系研究科 生体防御学)

Dr. Yasutaka Motomura, Osaka University

### 若手女性研究者研究支援事業

### **Outstanding Young Women Researcher Award Winners Introduction**

### 2021 年若手女性研究者研究支援事業受賞者(五十音順)

**Outstanding Young Women Researcher Award 2021 Winners** 

### 「シェーグレン症候群における T 細胞異常の解析」

"Pathogenic role of clonally expanded CD4+T cells in patients with primary Sjögren's syndrome"

安部 沙織 氏 (筑波大学 医学医療系内科 膠原病リウマチアレルギー)

Dr. Saori Abe, University of Tsukuba

### 「自己免疫疾患発症に寄与する T 細胞のリンパ組織内局在に着目した特性の解明」

"Elucidation of the characteristics of T cells contribute to the development of autoimmune diseases, focusing on their localization in lymphoid tissues"

安田 圭子 氏 (京都大学大学院医学研究科医学専攻 分子生体制御学講座 医化学分野)

Dr. Keiko Yasuda, Kyoto University

### 「きぼう」プロジェクト 免疫学博士課程学生支援 採択者紹介

"Kibou Projects 2021" Scholarship for Doctoral Students in Immunology Winners Introduction

西山 奈菜子 氏 (筑波大学)

Ms. Nanako Nishiyama, University of Tsukuba

東山 瑞希 氏(東京理科大学)

Ms. Mizuki Higashiyama, Tokyo University of Science

松浦 宏大 氏 (東京大学)

Mr. Kota Matsuura, The University of Tokyo

室井 きさら 氏 (慶應義塾大学)

Ms. Kisara Muroi, Keio University

森 正太郎 氏 (大阪大学)

Mr. Shotaro Mori, Osaka University

保倉 祥太 氏(京都大学)

Mr. Shota Yasukura, Kyoto University

江島 亜希 氏(京都大学)

Ms. Aki Ejima, Kyoto University

川尻 昭寿 氏 (東北大学)

Mr. Akihisa Kawajiri, Tohoku University

羽馬 直希 氏(北海道大学)

Mr. Naoki Hama, Hokkaido University

松本 龍太郎 氏 (慶應義塾大学)

Mr. Ryutaro Matsumoto, Keio University

八木田 麻裕 氏 (大阪大学)

Ms. Mayu Yagita, Osaka University

Wang Zhujun 氏(慶應義塾大学)

Ms. Wang Zhujun, Keio University

※「きぼう」プロジェクト免疫学博士課程学生支援の採択者の研究課題については、12月8日(水)18時15分からポスター発表をいたします。

<sup>\* &</sup>quot;Kibou Projects" Scholarship for Doctoral Students in Immunology Winners' Poster discussion will be started from 18:15 on 8th December.

# **Technical Seminar**

## **Technical Seminar**

11:45-12:45, Wednesday, December 8

### T01 Technical Seminar 1 Room A: Noh Theater

# T01-01 Mechanistic analysis of anti-tumor immune activation by microbiota induced type-I IFN signaling

Kenji Chamoto Department of Immunology and Genomic Medicine, Center for Cancer Immunotherapy and Immunobiology, Kyoto University Graduate School of Medicine

Merck Ltd. Japan

11:45-12:45, Wednesday, December 8

### T02 Technical Seminar 2 Room C: Conference Room 3&4

Chairperson: Kazuo Okamoto (Department of Osteoimmunology, Graduate School of Medicine and Faculty of Medicine, The University of Tokyo)

## T02-01 TCR repertoire analysis reveals spatiotemporal responses of tumor-reactive T cell clones

Satoshi Ueha Research Institute for Biomedical Sciences, Tokyo University of Science

TOMY DIGITAL BIOLOGY CO.,LTD.

11:45-12:45, Thursday, December 9

### T03 Technical Seminar 3 Room A: Noh Theater

Chairperson: Atsushi Tsurumune (Nikon Solutions Co., Ltd.)

#### T03-01 Elucidation of biological response of the skin using live imaging system

Kenji Kabashima Department of Dermatology, Kyoto University Graduate School of Medicine

Nikon Solutions Co., Ltd.

12:55-13:55, Friday, December 10

### T04 Technical Seminar 4 Room A: Noh Theater

Chairperson: Toshiaki Ohteki (Department of Biodefense Research, Medical Research Institute, TMDU Tokyo Medical and Dental University)

### T04-01 Post-transcriptional regulation of immune responses in inflammatory diseases

Osamu Takeuchi Department of Medical Chemistry, Graduate School of Medicine, Kyoto University, Kyoto, Japan

Nippon Becton Dickinson Company, Ltd.

12:55-13:55, Friday, December 10

### **T05** Technical Seminar 5 Room B: Conference Room 1&2

Chairperson: Yukinori Okada (Department of Statistical Genetics, Graduate School of Medicine, Osaka University)

### T05-01 Single-cell analysis of Immune responses in micro specimens

Hiroyuki Yoshitomi Department of Immunology, Graduate School of Medicine, Kyoto University

Scrum Inc./10x Genomics

12:55-13:55, Friday, December 10

### T06 Technical Seminar 6 Room C: Conference Room 3&4

Chairperson: Atsushi Iwama (Division of Stem Cell and Molecular Medicine, Center for Stem Cell Biology and Regenerative Medicine The Institute of Medical Science, The University of Tokyo)

# T06-01 Introducing principle and actual data of Bigfoot, High-Speed Spectral Cell Sorter Yoshishiro Koyama Thermo Fisher Scientific K.K.

Thermo Fisher Scientific

12:55-13:55, Friday, December 10

### T07 Technical Seminar 7 Room E: Reception Hall 2

Chairperson: Etsushi Kuroda (Department of Immunology, Hyogo College of Medicine)

### T07-01 Understanding and chemical controlling pyroptosis induced by irritating particulates

Tatsuya Saitoh Laboratory of Bioresponse Regulation, Graduate School of Pharmaceutical Sciences, Osaka University

Beckman Coulter K.K.

12:55-13:55, Friday, December 10

### **T08 Technical Seminar 8** Room F: Conference Room 5

Chairperson: Sho Yamasaki (Department of Molecular Immunology, RIMD, Osaka University)

### T08-01 Introduction of a human immunology research by using mass-cytometry (CyTOF)

Takayoshi Morita Department of Respiratory Medicine and Clinical Immunology, Graduate School of Medicine, Osaka University

Fluidigm K.K.

# **Clinical Seminar**

### **Clinical Seminar**

11:45-12:45, Wednesday, December 8

### C01 Clinical Seminar 1 Room D: Reception Hall 1

Chairperson: Yayoi Tada (Department of Dermatology, Teikyo University School of Medicine)

### C01-01 The roles of IL-17 and regulatory T cells in the pathophysiology of psoriasis

Sayuri Yamazaki Department of Immunology, Nagoya City University Graduate School of Medical Sciences

Novartis Pharma K.K.

11:45-12:45, Wednesday, December 8

### C02 Clinical Seminar 2 Room B: Conference Room 1&2

Chairperson: Kenji Kabashima (Dermatology, Kyoto University)

### From Bedside to Bench: Evolving concept of Type 2 inflammation

### C02-01 Type 2 immunity in atopic inflammation

Tetsuro Kobayashi Innate Immune Systems, Center for Integrative Medical Science, RIKEN, Kanagawa, Japan

### C02-02 Current therapeutic strategies for atopic dermatitis -regulation of type 2 inflammation-

Tetsuya Honda Department of Dermatology, Hamamatsu University School of Medicine, Shizuoka, Japan

Sanofi Genzyme Medical Operations, Sanofi K.K.

11:45-12:45, Wednesday, December 8

### C03 Clinical Seminar 3 Room E: Reception Hall 2

Chairperson: Keishi Fujio (Department of Allergy and Rheumatology, University of Tokyo)

# C03-01 Multi-omic Molecular Profiling for Rheumatoid Arthritis and Large Vessel Vasculitis Katsuya Suzuki Division of Rheumatology Department of Internal Medicine Keio University School of Medicine

#### C03-02 Effector B cells in autoimmune diseases: more than autoantibodies?

Hiroaki Niiro Department of Medical Education, Faculty of Medical Sciences, Kyushu University

CHUGAI PHARMATICAL CO., LTD.

### C04 Clinical Seminar 4 Room D: Reception Hall 1

Chairperson: Hiroshi Takayanagi (Department of Immunology, Graduate School of Medicine and Faculty of Medicine, The University of Tokyo)

### The latest findings on biomarkers and joint destruction mechanisms in rheumatoid arthritis

### C04-01 Joint destruction mechanism in the rheumatoid arthritis

Yuho Kadono Orthopaedic Surgery, Saitama Medical University, Saitama, Japan

## C04-02 The Significance of the Role of Biomarkers in the Clinic of Rheumatology -Focusing on Rheumatoid Arthritis-

Hidekata Yasuoka Division of Rheumatology, Department of Internal Medicine, Fujita Health University School of Medicine

Gilead Sciences K.K./Eisai Co., Ltd.

11:45-12:45, Thursday, December 9

### C05 Clinical Seminar 5 Room B: Conference Room 1&2

Chairperson: Isao Matsumoto (Department of Internal Medicine, Division of Rheumatology University of Tsukuba)

## C05-01 Role of TNFa-induced signaling in rheumatoid synovium and the blockade of this pathway in clinical practie

Shinsuke Yasuda Tokyo Medical and Dental University

### Mitsubishi Tanabe Pharma Corporation/Janssen Pharmaceutical K.K

11:45-12:45, Thursday, December 9

### C06 Clinical Seminar 6 Room C: Conference Room 3&4

Chairperson: Kimito Kawahata (Division of Rheumatology and Allergology, Department of Internal Medicine, St. Marianna University School of Medicine, Kawasaki, Japan)

### C06-01 Immune related adverse events (irAEs) - a novel immune disorder

Kosaku Murakami Center for Cancer Immunotherapy and Immunobiology, Graduate School of Medicine, Kyoto University, Kyoto, Japan

### C06-02 Clinical significance of autoantibodies in patients with rheumatoid arthritis

Takao Fujii Department of Rheumatology and Clinical Immunology, Wakayama Medical University, Wakayama, Japan

Bristol-Myers Squibb K.K. / ONO PHARMACEUTICAL CO., LTD.

11:45-12:45, Thursday, December 9

### C07 Clinical Seminar 7 Room E: Reception Hall 2

Chairperson: Toshihiro Nanki (Division of Rheumatology, Department of Internal Medicine, Toho University School of Medicine)

C07-01 Dysregulation of acquired immunity in organ specific autoimmune disease ~Pathogenic roles and therapeutic potential of autoantibodies and autoantigens specific T cells in Sjögren's syndrome~

Hiroto Tsuboi Division of Rheumatology, Department of Internal Medicine, Faculty of Medicine, University of Tsukuba

**ASAHI KASEI Pharma** 

11:45-12:45, Thursday, December 9

### C08 Clinical Seminar 8 Room F: Conference Room 5

Chairperson: Keishi Fujio (Department of Allergy and Rheumatology, University of Tokyo)

### C08-01 Rheumatoid arthritis and osteoporosis; pros and cons of glucocorticoids

Kunihiro Yamaoka Kitasato University School of Medicine, Department of Rheumatology and Infectious Diseases

### DAIICHI SANKYO COMPANY, LIMITED

11:45-12:45, Friday, December 10

### C09 Clinical Seminar 9 Room D: Reception Hall 1

Chairperson: Kojiro Sato (Division of Rheumatology and Clinical Immunology, Department of Medicine, Jichi Medical University)

#### C09-01 An update on research advances in rheumatoid arthritis and Sarilumab

Hiroufmi Shoda Department of Allergy and Rheumatology, Graduation School of Medicine, the University of Tokyo

**ASAHI KASEI Pharma** 

11:45-12:45, Friday, December 10

### C10 Clinical Seminar 10 Room B: Conference Room 1&2

Chairperson: Kenji Kabashima (Dermatology, Kyoto University)

### C10-01 Emerging JAK inhibitors in atopic dermatitis

Atsushi Otsuka Kindai University Hospital

AbbVie GK

11:45-12:45, Friday, December 10

### C11 Clinical Seminar 11 Room C: Conference Room 3&4

Chairperson: Atsushi Kumanogoh (Department of Respiratory Medicien and Clinical Immunology, Osaka Univ Graduate School of Medicine, Osaka, Japan.)

### C11-01 The role of endoribonuclease Regnase-1 in inflammation, immunity, and metabolism

Shizuo Akira Laboratory of Host Defense, WPI Immunology Frontier Research Center, Osaka University, Osaka, Japan / Department of Host Defense, Research Institute for Microbial Diseases, Osaka University, Osaka, Japan

Otsuka Pharmaceutical

11:45-12:45, Friday, December 10

### C12 Clinical Seminar 12 Room E: Reception Hall 2

Chairperson: Shinsuke Yasuda (Rheumatology, Tokyo Medical and Dental University)

### C12-01 Rheumatoid arthritis in the era of JAK inhibitors

Hiroaki Niiro Department of Medical Education, Faculty of Medical Sciences, Kyushu University

Pfizer Japan Inc.

11:45-12:45, Friday, December 10

### C13 Clinical Seminar 13 Room F: Conference Room 5

Chairperson: Keishi Fujio (Department of Allergy and Rheumatology, University of Tokyo)

### C13-01 Updated mechanisms in regulation of autoimmune arthritis via TNF inhibitors

Isao Matsumoto Division of Rheumatology, Department of Internal Medicine, University of Tsukuba

**AYUMI Pharmaceutical Corporation** 

12:55-13:55, Friday, December 10

### C14 Clinical Seminar 14 Room D: Reception Hall 1

Chairperson: Kenji Kabashima (Department of Dermatology, Graduate School of Medicine, Kyoto University)

### C14-01 The role of IL-23 in the pathogenesis of psoriasis: update your knowledge

Gyohei Egawa Department of dermatology, Graduate School of Medicine, Kyoto University, Japan

### C14-02 The role of skin T cells in the pathogenesis of psoriasis

Rei Watanabe Department of Integrative Medicine for Allergic and Immunological Diseases, Graduate School of Medicine/Faculty of Medicine, Osaka University

Janssen Pharmaceutical K.K.

# **Afternoon Seminar**

### **Afternoon Seminar**

15:45-16:45, Thursday, December 9

### A01 Presentation by Outstanding Young Immunology Researcher Award Winners Room A: Noh Theater

Chairpersons: Shigeo Koyasu (RIKEN and President of JSI)

Akira Shibuya (R&D Center of Innovative Drug Discovery, University of Tsukuba)

### A01-01 Analysis of immune cells in the brain

Minako Ito Medical Institute of Bioregulation, Kyushu University, Fukuoka, Japan

### A01-02 Adaptive immune features of natural killer cells

Tsukasa Nabekura Life Science Center for Survival Dynamics, Tsukuba Advanced Research Alliance (TARA),
University of Tsukuba, Japan / Department of Immunology, Faculty of Medicine, University of
Tsukuba, Japan / R&D Center for Innovative Drug Discovery, University of Tsukuba, Japan

## A01-03 Single-cell RNA-seq analysis provides novel insights into the mechanism underlying the termination of basophil-elicited allergic inflammation in the skin

Kensuke Miyake Advanced Research Institute, Tokyo Medical and Dental University (TMDU)

Nippon Becton Dickinson Company, Ltd.

16:55-17:55, Thursday, December 9

### A02 Presentations by the 2020 Outstanding Young Women Researcher Awardees and Ceremony of 2021 Awardees Room A: Noh Theater

Chairpersons: Shigeo Koyasu (RIKEN and President of JSI)

Akira Shibuya (R&D Center of Innovative Drug Discovery, University of Tsukuba)

## A02-01 Maintenance of epithelial homeostasis by *FoxI1*-expressing stromal cells through CXCL12 production in the colon

Hisako Kayama Institute for Advanced Co-Creation Studies, Osaka University / Graduate School of Medicine, Osaka University

### A02-02 Analysis of Paneth cell glycosylation and function throughout the small intestine

Mariko Kamioka Department of Mucosal Immunology, IMSUT Distinguished Professor Unit, The Institute of Medical Science, The University of Tokyo

TOMY DIGITAL BIOLOGY CO.,LTD.
